e-IRG Workshop

Panel discussions

Leif Laaksonen
CSC, IT Center for Science, Finland
e-IRG workshop, 13-14 October 2011

EUDAT

The current data infrastructure landscape: challenges and opportunities (EUDAT)

- There is no one solution fits all! No need to match the needs of all communities at the same time, addressing a group of communities can be very valuable as well.

- There is no competition but complementary between EUDAT and the other infrastructures.

- Several of EUDAT partners are also key players in EGI and PRACE

- We shouldn't work along this division! In EUDAT the frontiers are not always relevant, where we have "users" which are also "providers" to their communities and work with the others to co-design services.

- Training, education, skills and avoiding pitfalls of data flirting.

- We must have insight, knowledge and collaboration!

EUDAT

How to get in touch with EUDAT?

Kimmo Koski, CSC - IT Center for Science
EUDAT Project Coordinator
Kimmo.Koski@csc.fi

Peter Wittenburg, Max Planck Institute for Psycholinguistics at Nijmegen (MPI-PL)
EUDAT Scientific Coordinator
Peter.Wittenburg@mpi.nl

Damien Lecarpentier, CSC - IT Center for Science
EUDAT Project Manager
Damien.Lecarpentier@csc.fi

THANK YOU!
