HPC utilization in firms: policy & avenues

e-IRG workshop, 4 Dec 2019, Helsinki

Senior Specialist Lasse Laitinen

Ministry of Economic Affairs
and Employment of Finland

Is there a danger of “cargo cult” thinking?

https://business-digest.eu/en/2019/06/17/are-you-guilty-of-cargo-cult-thinking-without-even-knowing-it/

How to increase firm usage with impact?

- A carpenter doesn't know how to use an automated production line, and doesn't find the way to the factory
- Usage in co-projects with universities and other research organizations
- Need to develop general RDI competencies
- Larger role for cluster & ecosystem actors as connectors and orchestrators of the enterprise sector
- Flagships of the Academy of Finland (excellence & impact) – FCAI, 6Genesis, FinnCeres, Prein
- Growth Engines of Business Finland as users of data processing services
- Usage by the public sector, incl. the Ministry of Economic Affairs and Employment of Finland Group, e.g. VTT and Geological Survey of Finland

Thank you!
