

*Co-ordination & Harmonisation of Advanced e-Infrastructures
for Research and Education Data Sharing*

Coordination of intercontinental e-infrastructures

Federico Ruggieri (GARR/INFN)

e-IRG Workshop, Rome, Italy
10-11 November 2014

- ▶ General Information on CHAIN-REDS
- ▶ An overview of regional e-Infrastructures
- ▶ The Vision and the Actions
- ▶ Use cases
- ▶ Conclusions

- ▶ Co-ordination & Harmonisation of Advanced eInfrastructures for Research and Education Data Sharing
- ▶ Research Infrastructures – Support Action
- ▶ Grant Agreement n. 306819
- ▶ Total Costs of € 2.3 M
- ▶ Max. EC contribution: € 1.52 M
- ▶ Start date: 1 December 2012

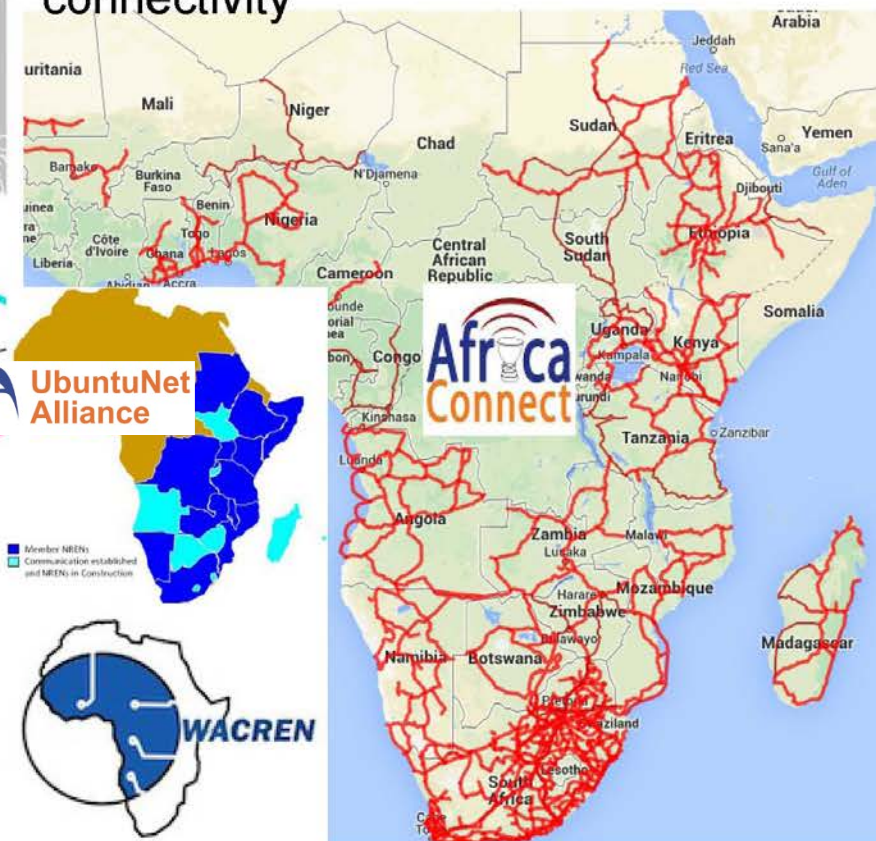

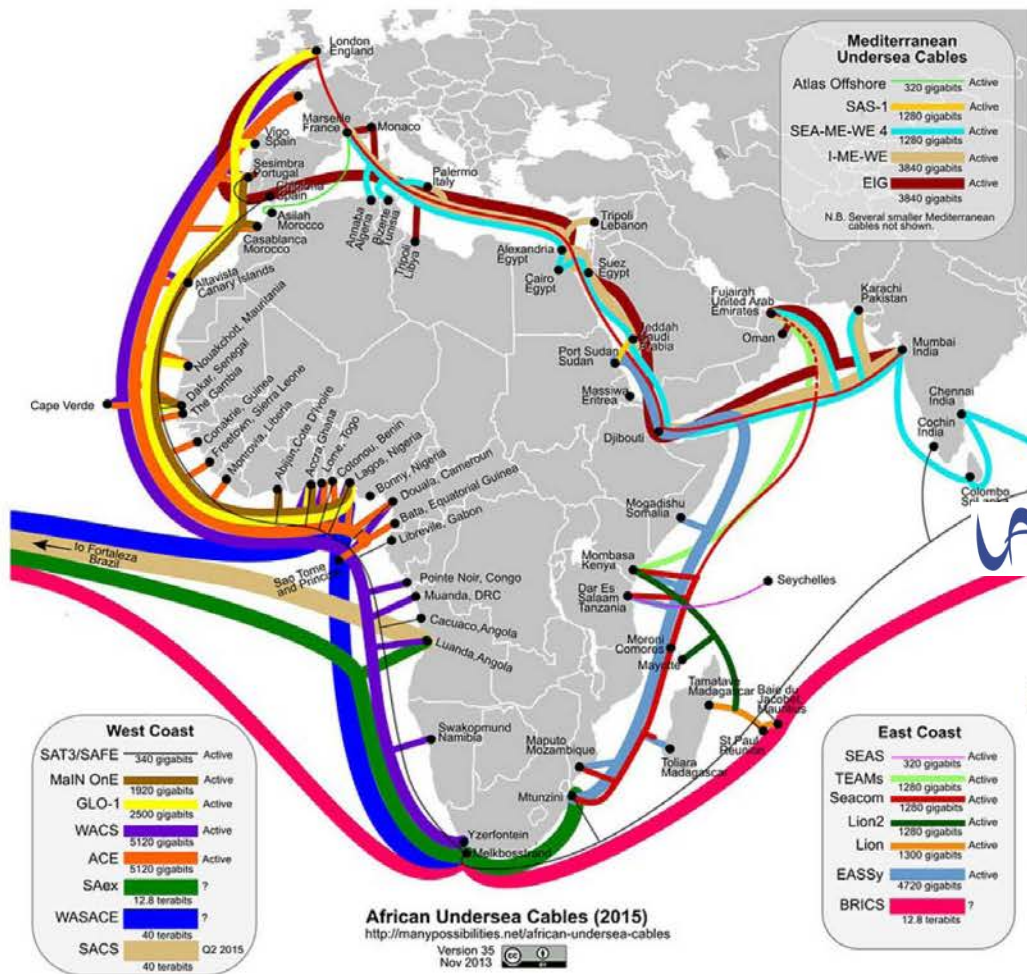

▶ **3** Duration: 30 Months

Partners and roles

- ▶ INFN (IT) – Coordinator
- ▶ CIEMAT (ES) – WP4 Leader
- ▶ GRNET (GR) – WP3 Leader
- ▶ CESNET (CZ) – WP5 Leader
- ▶ UBUNTUNET (MW) – Africa
- ▶ CLARA (UR) – Latin America
- ▶ IHEP (CN) – China
- ▶ ASREN (DE) – Arab States
- ▶ SIGMA ORIONIS (FR) – WP2 Leader
- ▶ C₄DAC (IN) – India

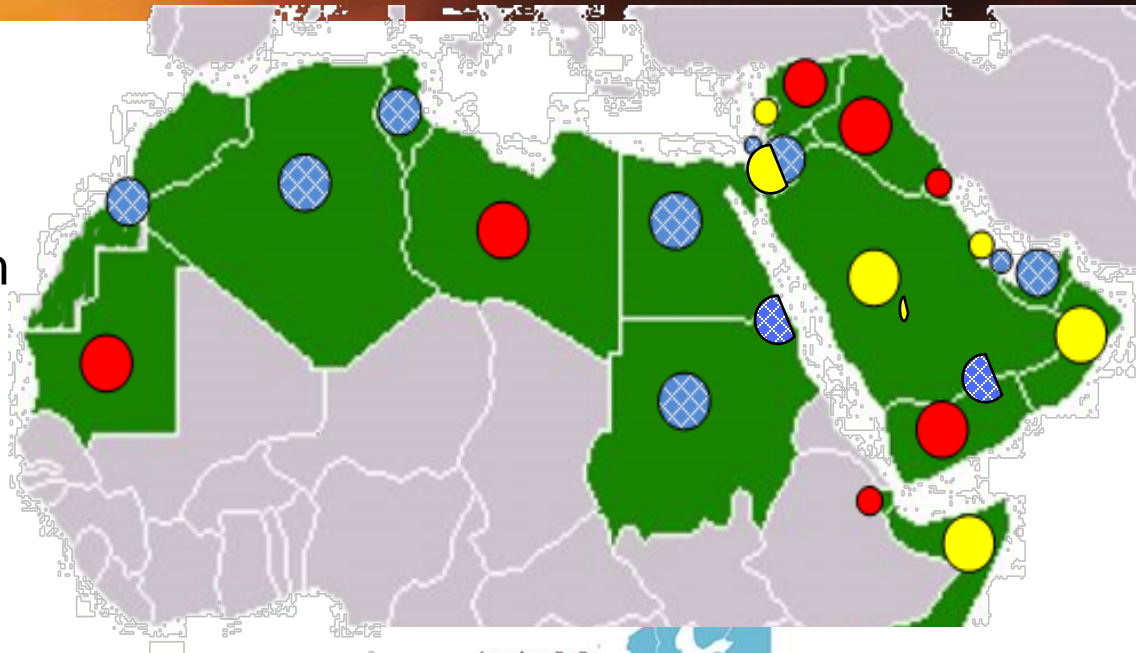

AfricaConnect project improving NREN capacity and cross-border connectivity

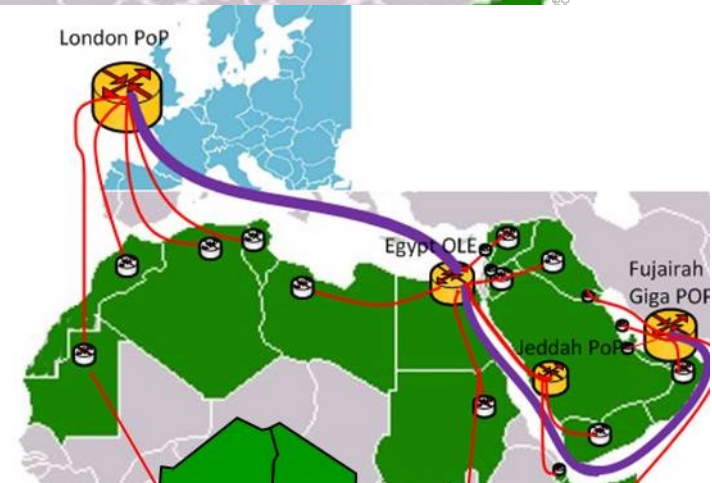

<http://manypossibilities.net/afterfibre/>

Arab States Research & Education Network

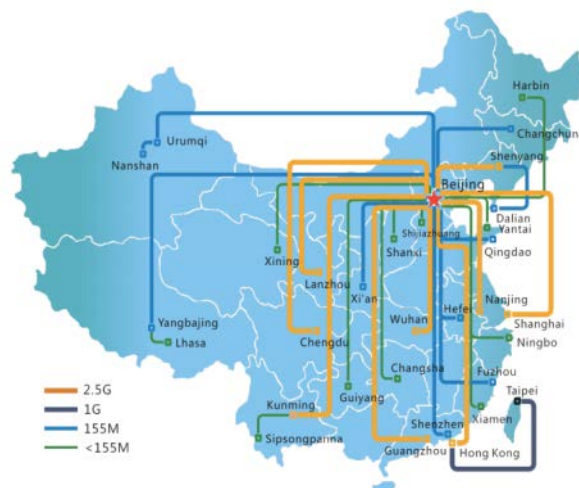

- ▶ Arab NRENs: 9 Mature, 5 Developing, 8 Starting
- ▶ Logical PoPs: London, Fujairah, Alexandria, Jeddah
- ▶ EUMEDGRID legacy continued
- ▶ 9 Grid sites (MA, JO, EG, KU, SY, DZ1,2, 3, UAE)
- ▶ Africa-Arabia ROC
- ▶ 4 HPC sites (EG, SA, UAE, QA)
- ▶ Cloud initiatives with Cloud infrastructure towards a widespread Open Source Software

ASREN
Arab States Research and Education Network

China - CSTNet, CERNET and CNGI

- ▶ **CSTNet (China Science & Technology Network)**
- ▶ **S&T Network in China**
- ▶ **Backbone 2.5G**
- ▶ **Over 20 provinces**
- ▶ **Over 100 Research Institutes**
- ▶ **Over 1M End Users**

- ▶ **CERNET (China Education & Research Network)**
- ▶ **Biggest NREN in China**
- ▶ **Backbone 100G**
- ▶ **31 provinces and over 200 cities**
- ▶ **38 PoPs (+25)**
- ▶ **Over 2000 universities and institutes**
- ▶ **30M (+2M) users**

- ▶ **CNGI: Chinese Next Generation Internet**
- ▶ **CNGI-6IX: International exchange point for CNGI**
- ▶ **Good connections with international and domestic networks**

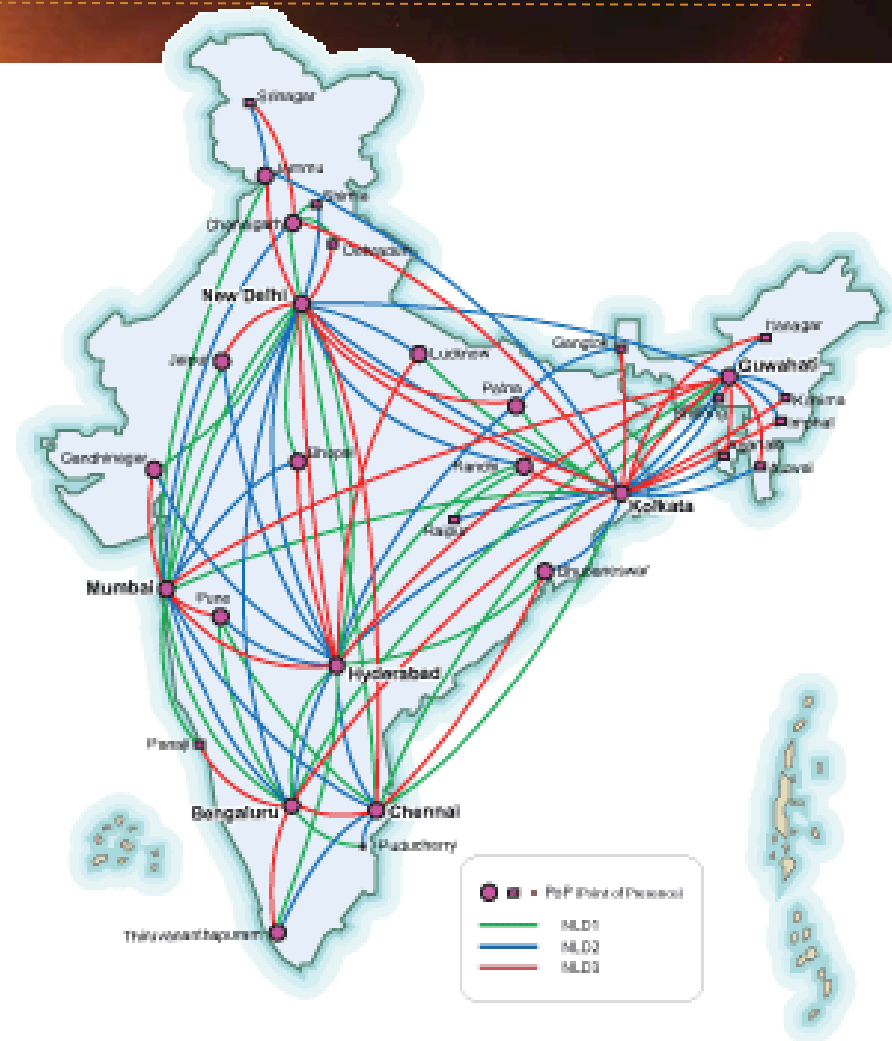

China: CNGrid

- ▶ 14 sites
- ▶ >3PF aggregated computing power
- ▶ >15PB storage
- ▶ >450 services
- ▶ >2800 users
- ▶ China commercial Aircraft Corp; Bao Steel; automobile; institutes of CAS; universities.
- ▶ Supporting >700 projects
 - ▶ National Projects (973, 863), and those funded by National Science Foundation of China and Chinese Academy of Sciences

India - National Knowledge Network

- ▶ A state-of-the-art multi-gigabit pan-India network for providing a unified high speed network backbone for all knowledge related institutions in the country
- ▶ An ultra-high speed CORE (multiples of 10 Gbps), with a distribution layer at speeds of 1 Gbps or higher.

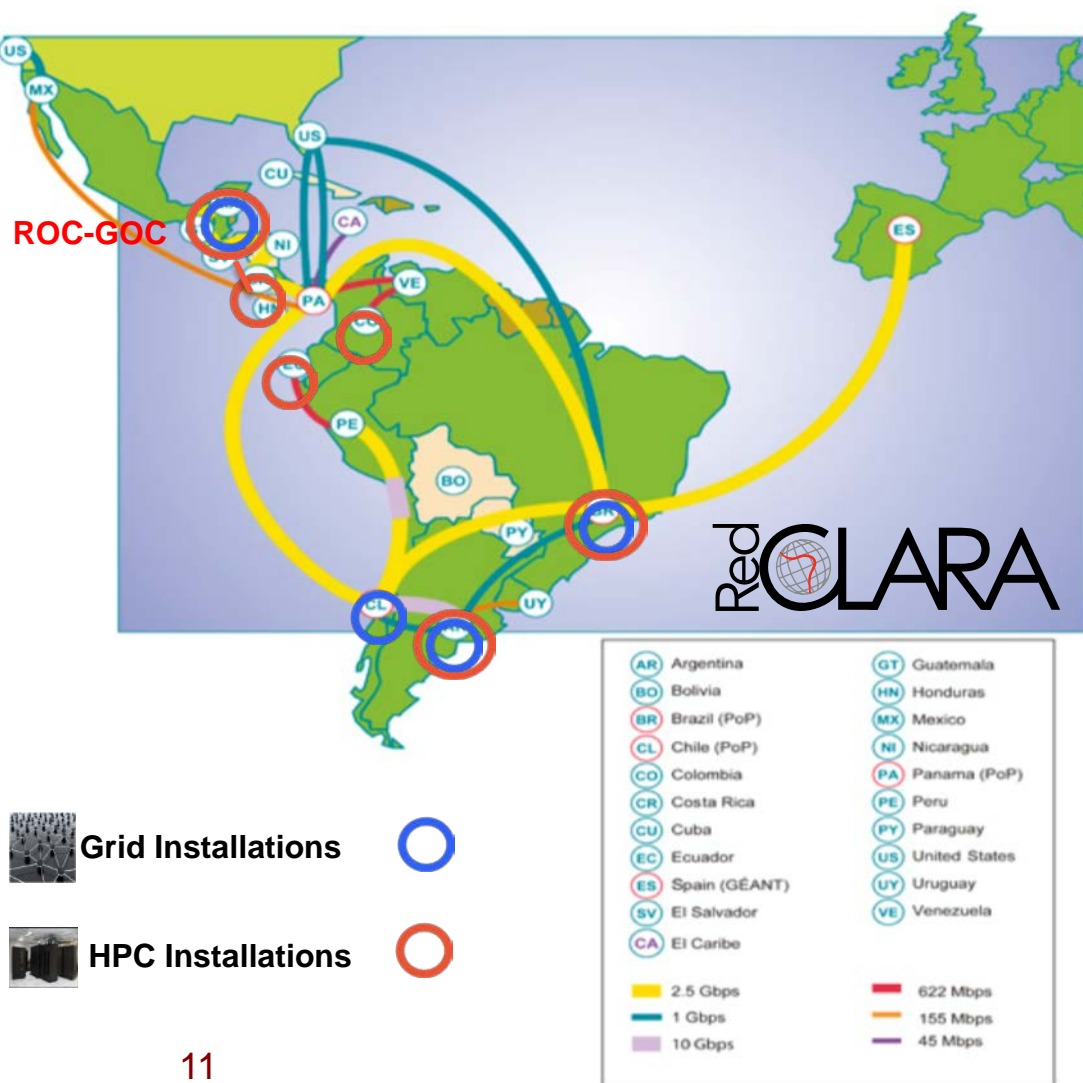

Multiple 10G Connecting all the State Capitals
Gigabit Connectivity to all the 640 Districts

India - GARUDA - on NKN

- ▶ Global Access to Resources Using Distributes Architecture – National grid initiative by C-DAC
- ▶ Aggregates HPC clusters from C-DAC centres and partners
- ▶ Currently over 10000 CPUs (~ 550 teraflops) and 220 TB of storage to provide distributed data
- ▶ The GARUDA is interconnected by the NKN - a highly reliable and secure national backbone

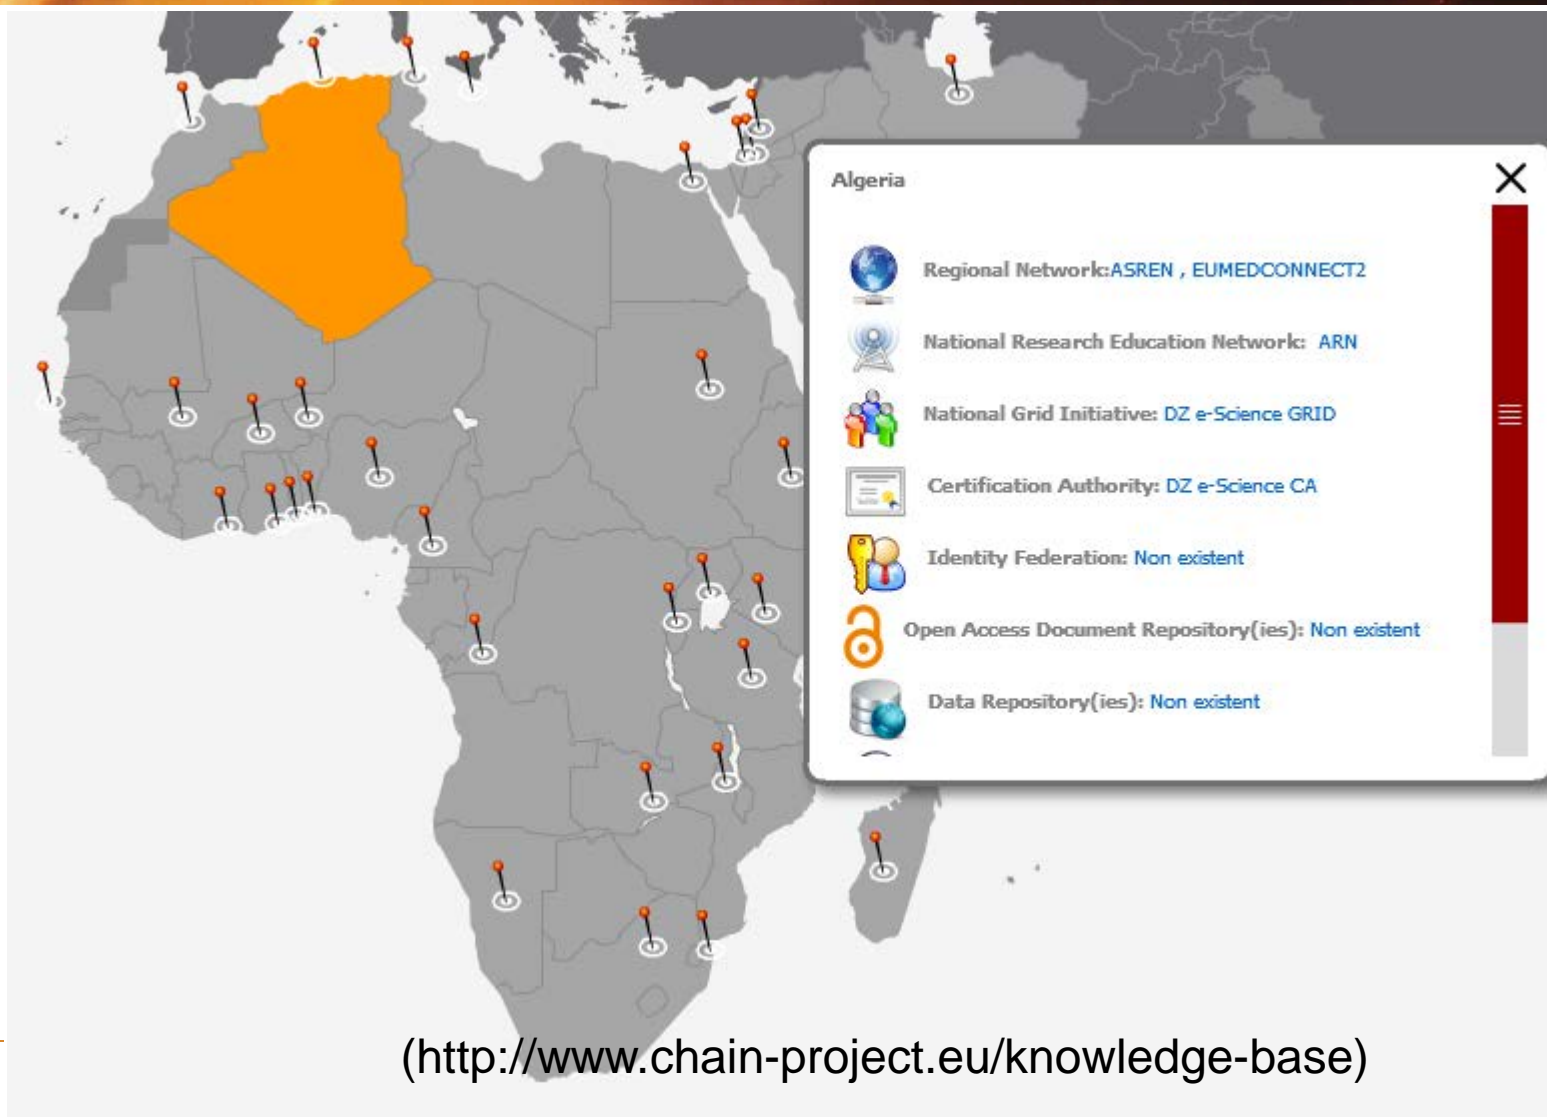

Servicio de Computo Avanzado para America Latina y el Caribe, SCALAC. It is the integration, at organizational level, of LA regional resources to provide advanced computational services. We have:

- **ROC-LA** supports **Grid Services** (HEP + Astroparticle communities)
- **Network HPC Centres** in LA
 - SINAPAD (Brazil)
 - SNCAD (Argentina)
 - CEDIA (Ecuador),
 - CENAT (Costa Rica),
 - UNAM (Mexico),
 - SC3/GridColombia (Colombia),
 - CeCalCULA (Venezuela)

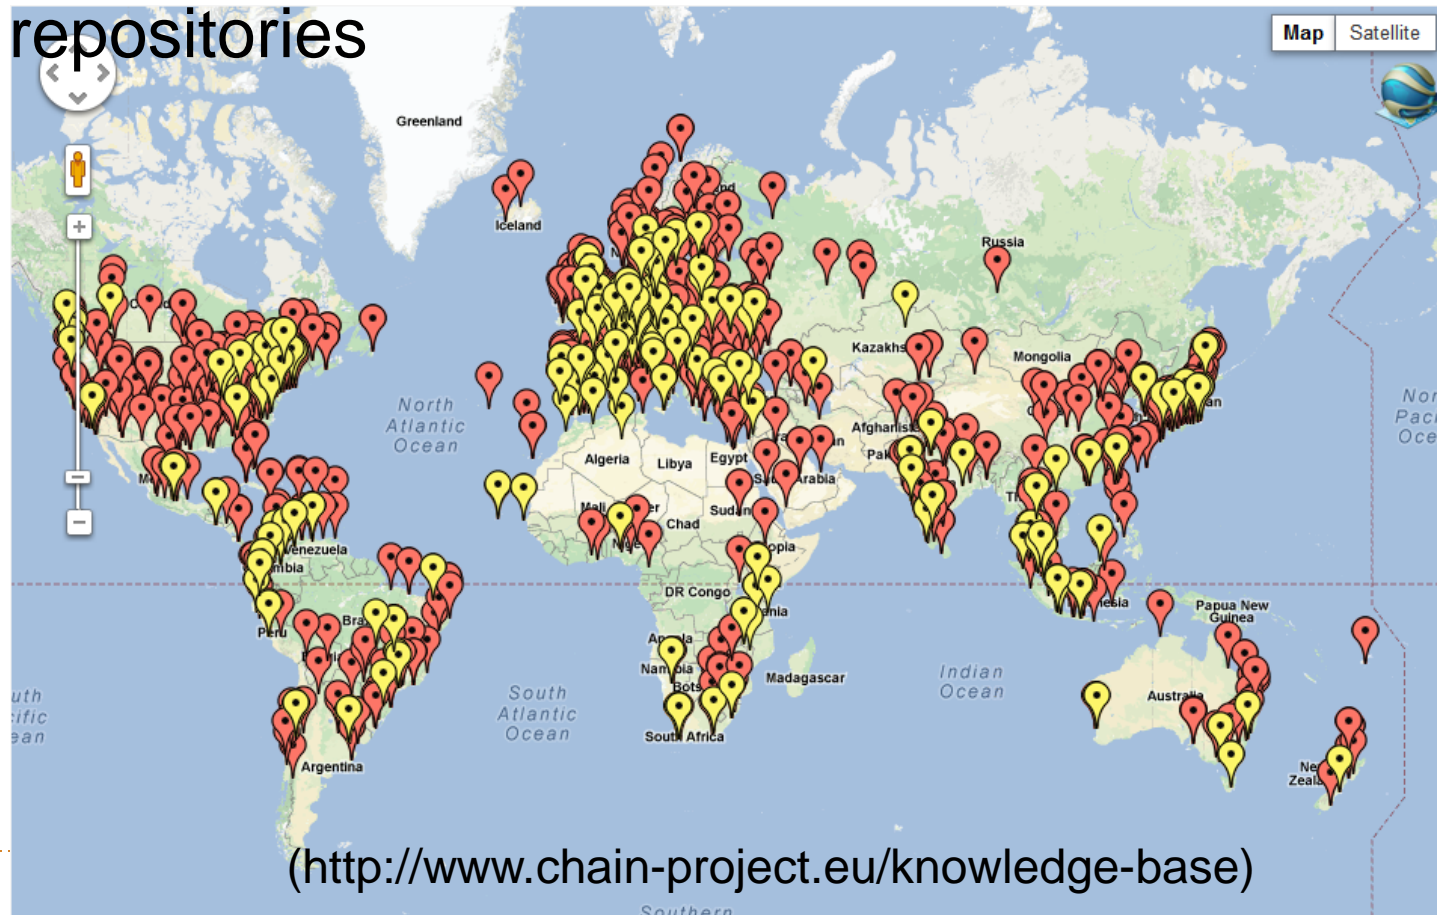

- ▶ Promote and support technological and **scientific collaboration across different e-Infrastructures established and operated in various continents** to facilitate their uptake and use by established and emerging Virtual Research Communities (VRCs) but also by single researchers
- ▶ Not only disseminate, exchange and reinforce the best practices currently adopted in Europe and other continents, but also **promote the progress of interoperability among different regional e-Infrastructures**
- ▶ Study and **define a path towards a global e-Infrastructure ecosystem** that will allow VRCs, research groups and even single researchers to access and efficiently use worldwide distributed resources

The Knowledge Base

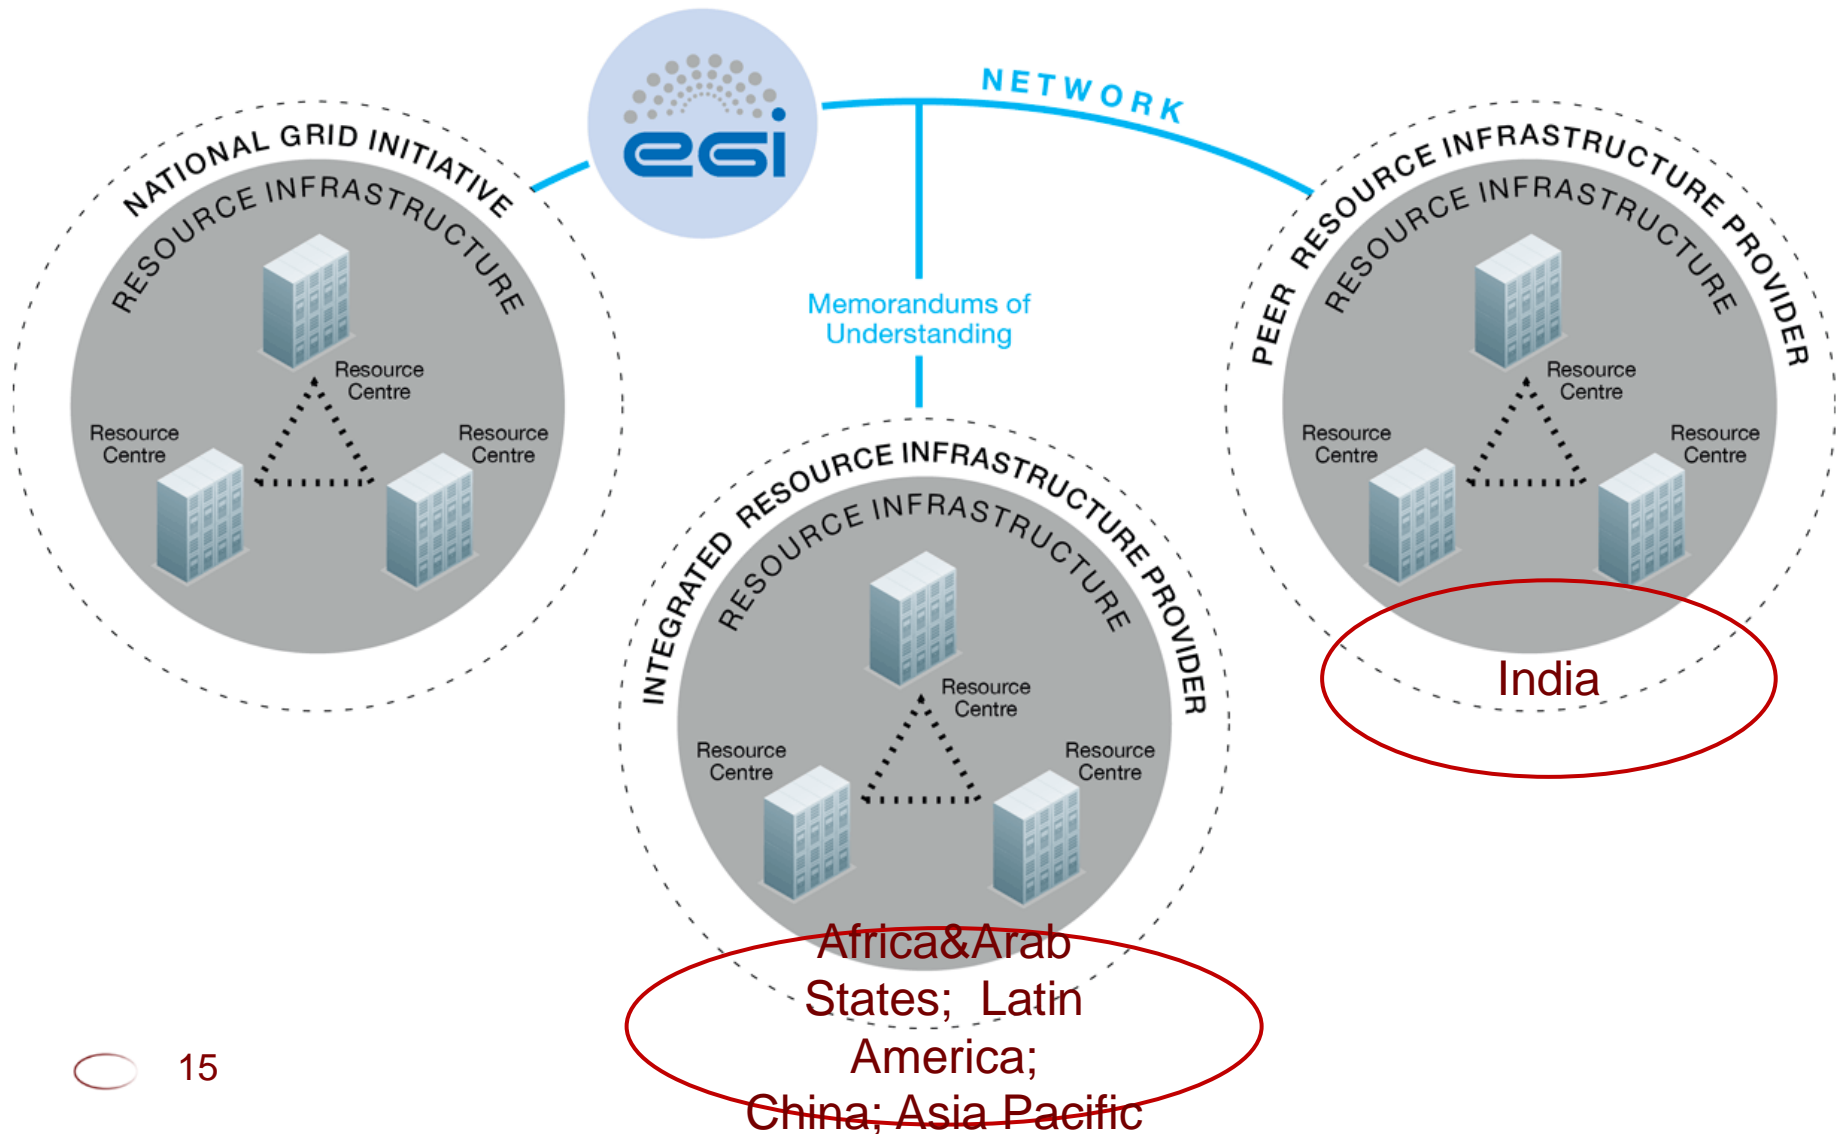

The KB of Open Access Repositories

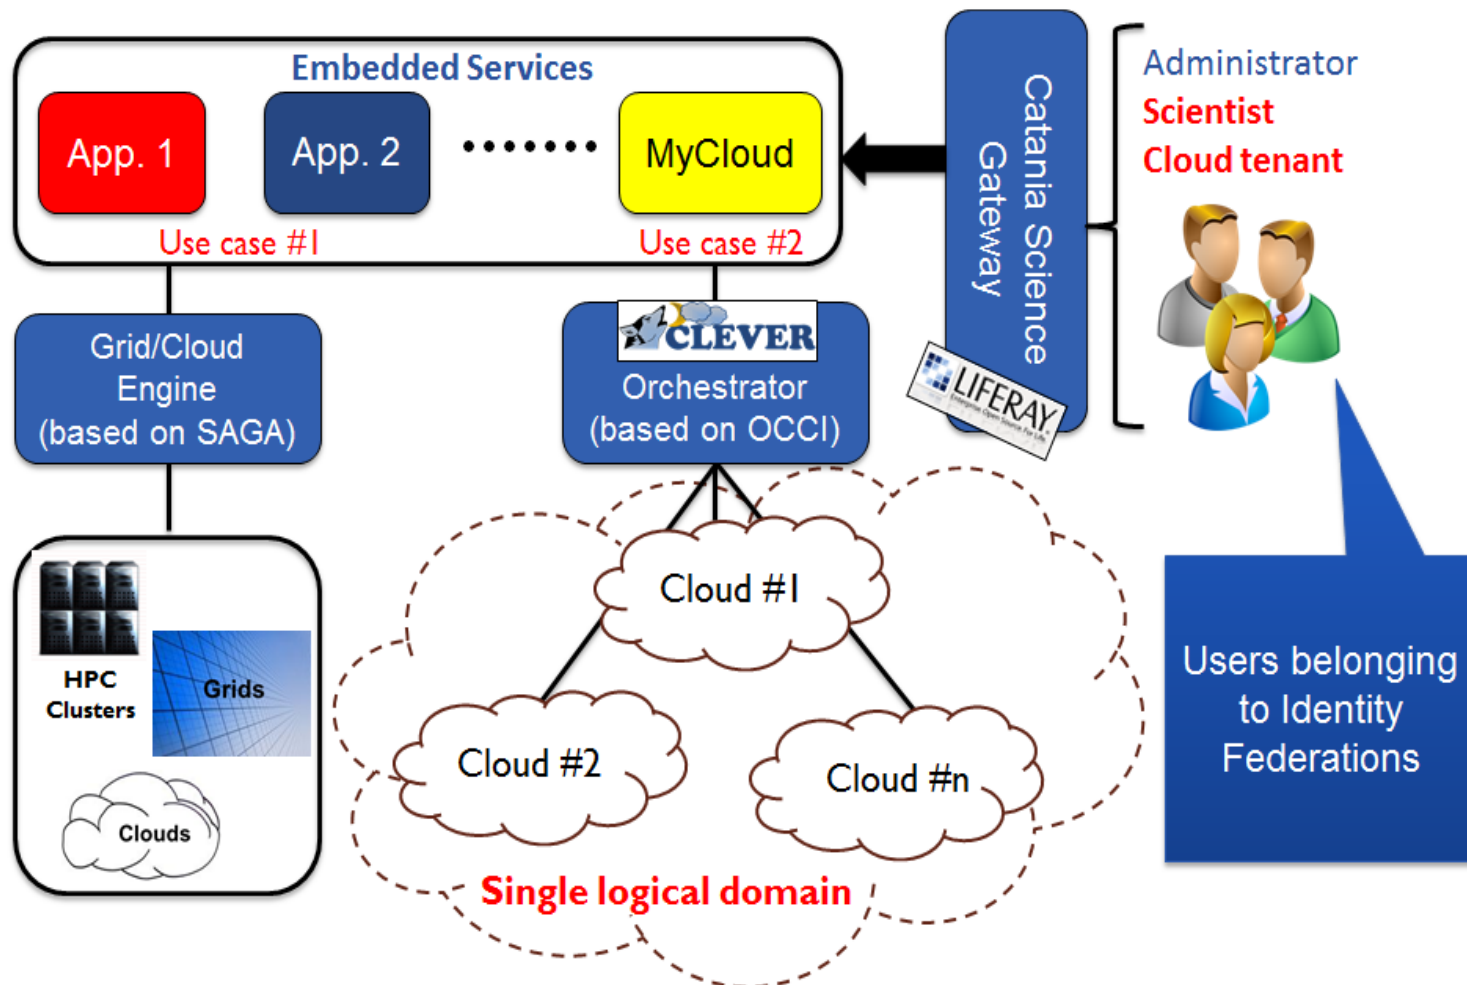

- ▶ The Knowledge Base of e-Infrastructures has been extended to open access data document and (recently) educational repositories

(<http://www.chain-project.eu/knowledge-base>)

Science Gateway and Standards: SAGA, OCCI, CDMI

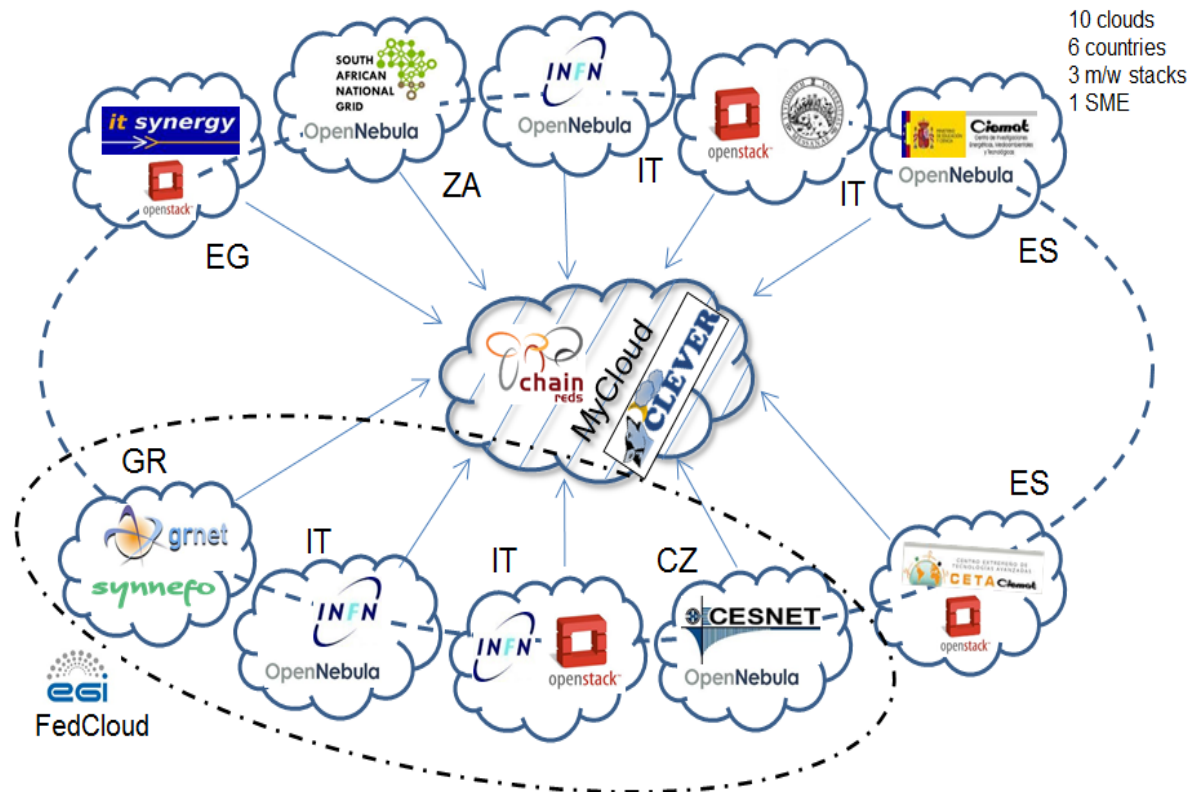

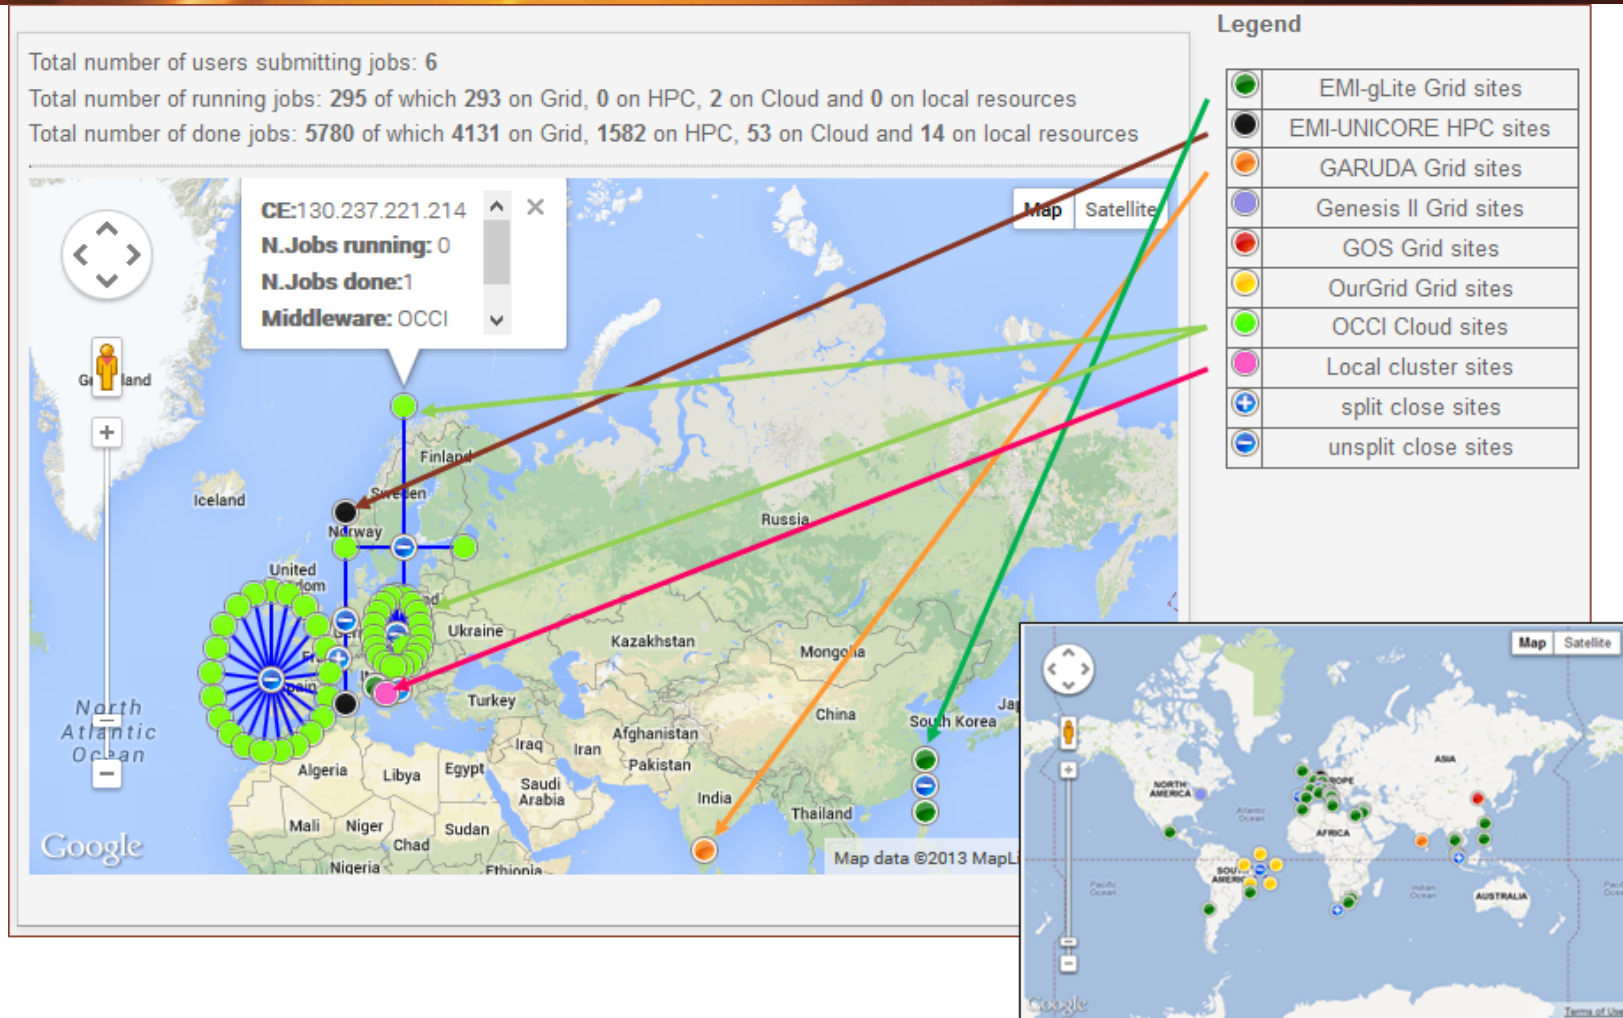

► Baseline example for cloud federation: EGI Federated Cloud Task Force

- OCCl and CDMI standards as a prerequisite for cloud federation
- Orchestration system, based on CLEVER, linking several Cloud providers

► Cloud federation demo

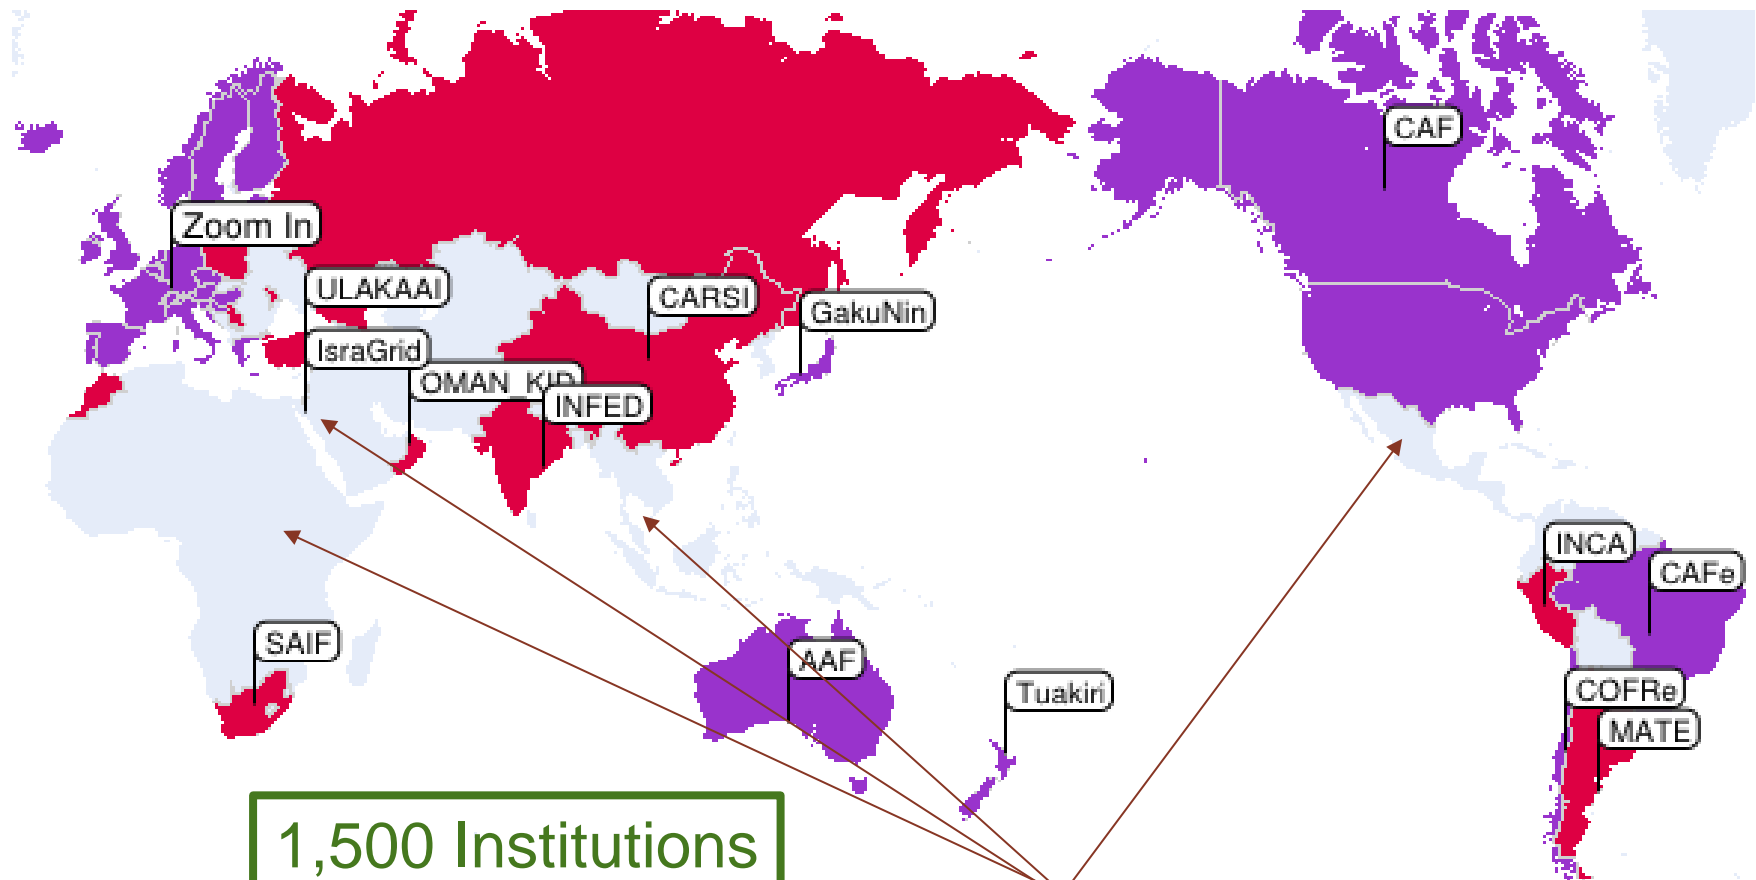

- As an application accessible by the CHAIN-REDS Science Gateway

Federated Identities

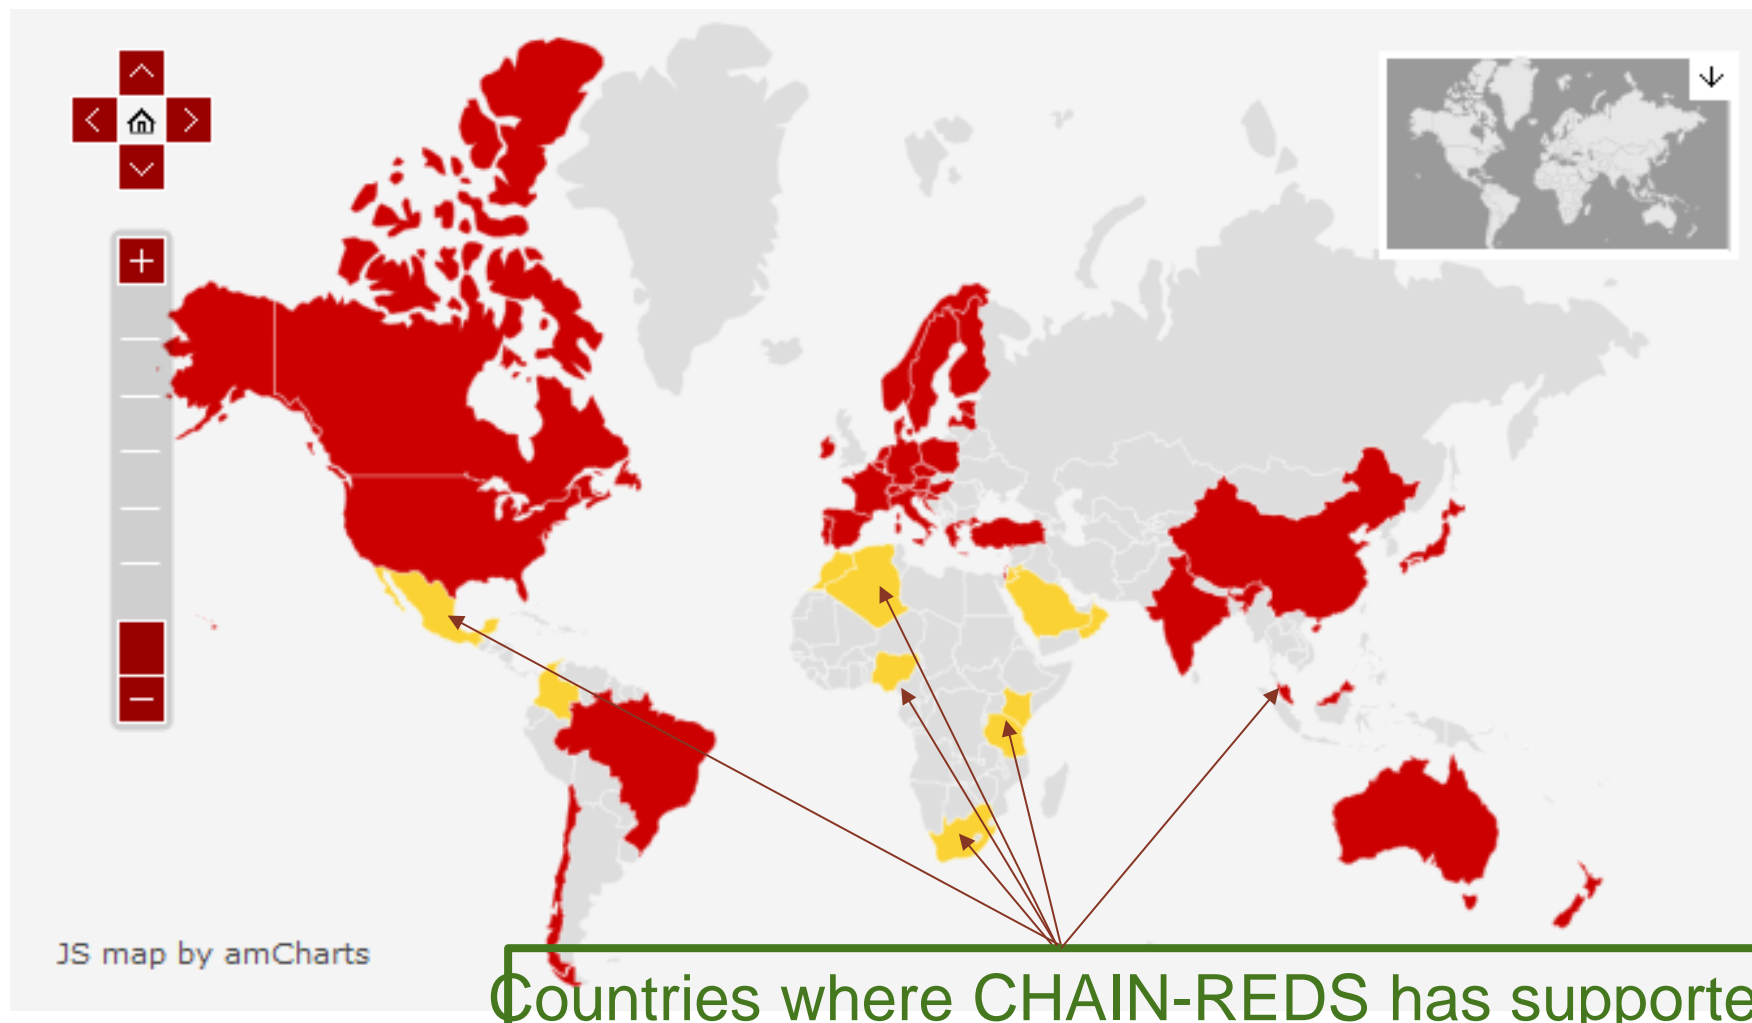

■ Pilot ■ Production

1,500 Institutions
2,100 Services
>17 million people

A lot of work still to be done

Federated Identities – The CHAIN-REDS impact

- ▶ APHRC (Africa)
 - ▶ Societal health and well-being domain
- ▶ LAGO (LA)
 - ▶ Astroparticle domain
 - ▶ DART based
- ▶ GROMACS (India)
 - ▶ Molecular dynamics domain
- ▶ ABINIT (Arab region)
 - ▶ *Ab initio* calculations on quantum chemistry and Physics of materials domains
- ▶ TreeThreader (China)
 - ▶ Life processes at the molecular level

- ▶ “APHRC is a ***leading pan-African research institution*** headquartered in Nairobi, Kenya, that conducts high quality ***policy-relevant*** research on **population, health, education, urbanization** and related development issues across Africa.”
- ▶ “Over the last decade, APHRC has contributed to a better Africa through quality research, and ***results-based strategic communications and policy engagement.***”

- ▶ APHRC mandate: better societies and government through the use of quality data
- ▶ Donor and mission require that data is open, publicly available and accountable
- ▶ *#Data4Dev* is a hot topic:
 - ▶ African needs a data revolution;
<http://aphrc.org/blog/you-say-you-want-a-data-revolution>
 - ▶ And there is a plan:
<http://www.cgdev.org/blog/delivering-data-revolution-sub-saharan-africa>

4 CHALLENGES WITH DATA IN SUB-SAHARAN AFRICA

1. NATIONAL STATS OFFICES LACK INDEPENDENCE

12 / 54

Fraction of African Union Countries that benefit from autonomous National Statistics Offices.

(Regional Strategic Framework for Statistical Capacity Building in Africa, 2010)

2. INACCURATE DATA

17%

Discrepancy between UNESCO data and household surveys for primary school enrollment in Tanzania.

Reproducibility

3. DONORS DOMINATE PRIORITIES

54%,
80%,
80%

Share of National Stats Office budgets provided by donors in Tanzania, Ethiopia, and Malawi, respectively.

4. DATA KEPT BEHIND CLOSED DOORS

56

Percent of microdata from household surveys conducted from 2000-2014 that are publicly available.
(IHSN catalogue)

Accessibility

What CHAIN-REDS is doing for APHRC ?

► Support provided:

- **Consultancy** on the benefit of issuing persistent identifiers
- **Access** to EPIC **PID** issuer
- **Reference** implementation of **PID** issuer for existing data sets

► Activities:

- **MoU** signed with APHRC: “Promotion of **standards** to **widen** and **simplify** the access to e-Infrastructures worldwide and federation of Big Data archives across continents” 
- **Standards and interoperability**: Ongoing technical investigation to determine feasibility of integrating IHSN with semantic search engine 
- **Availability** (APHRC already have a microdata portal)
 - <http://aphrc.org/catalog/microdata/index.php/catalog> 
- **Discoverability and impact**: Included in CHAIN-REDS Knowledge 

○ Base, issued PIDs to data sets

Inter-Regional
Coordination

Data

Grids

Networks

Federated
Identities

European
Coordination

e-Infrastructures

- ▶ CHAIN-REDS Vision has been implemented in a series of actions to promote coordinated activities among regional e-Infrastructures
- ▶ Interoperation, Science Gateways, Identity Federations and standards are promoted to support intercontinental VRCs activities
- ▶ Successful demos have been deployed for Federated Clouds and DART
- ▶ Five Use Cases are supported to show the successful implementation of the project's vision
- ▶ The project is currently filling the gap of stable Inter-regional Coordination: a Plan will be proposed in the final part of the activity
- ▶ Are peer-to-peer MoUs between regional e-Infrastructures enough ?
- ▶ Contributions from e-IRG are needed to propose a realistic and stable Inter-regional coordination activity for the future

***Co-ordination & Harmonisation of Advanced e-Infrastructures
for Research and Education Data Sharing***
