

# Connecting grids worldwide

Kors Bos

Rossend Llurba

Germany, Greece, Japan, Korea,  
Netherlands,

# Recommendations

pag. 70 of the WP

- Funding agencies to establish formal agreements
- F.A. to set up regular meetings to monitor related activities
- Closer co-operation between CA groups
- A database of grid related activities should be made

# Comments to the Recommendations

pag. 70 of the WP

- Collaboration to be established at all levels
- Different for more and less developed countries
- Easier to collaborate on data exchange than on cpu usage
- Exchange/fellowship programs specifically with AP and US?
- Encourage funds to be made available for standardisation
- Accounting is important to make international collaboration at all possible
- Catalogue of resources and grid activities would be very useful; can be connected with the ESFRI initiative
