

# International Initiatives on Research Data Management: from Policy to Practice

*Juan Bicarregui*

STFC - Head Data Division

RCUK - Chair Data Policy sub-Group

RDA - Chair Organisational Advisory Board

E-IRG

~~Amsterdam, 3 December 2012~~

Athens, 9 June 2014

# Overview

- Policy Context update
  - A quick overview of some recent policy statements
- The Research Data Alliance
  - What is the RDA?
  - Where are we now?
  - What's next?

# The Policy Context

- **OECD, 2004-2006**
  - Principles and *Guidelines* for Access to Research Data from Public Funding
- **EC, 2007-2012**
  - Recommendation on access to and preservation of scientific information
- **G8+5, 2011-2012**
  - Global Research Infrastructure Sub Group on Data
- **Research Councils UK, 2011**
  - Joint Principles on Data
- **Royal Society, 2011-2012**
  - Science as an Open Exercise
- **US OSTP (2013)**
  - Increasing Access to the Results of Federally Funded Scientific Research
- **G8 Science Ministers Statement (2013)**
  - Open Scientific Research Data

The views expressed herein are the personal views of the author and do not necessarily reflect the views of the policy makers

# Research Drivers

- National Academy of Science (2009).
  - researchers should make research data, methods, and other information integral to their publicly reported results publicly accessible, in a timely manner, **to allow verification of published findings and to enable other researchers to build on published results, ....**
- Royal Society (2012)
  - Open inquiry is at the heart of the scientific enterprise. Publication of scientific theories - and of the experimental and observational data on which they are based - **permits others to identify errors, to support, reject or refine theories and to reuse data for further understanding and knowledge.** Science's powerful capacity for self-correction comes from this openness to scrutiny and challenge.

# What is meant by Data

US OSTP:

“data is defined ...

- as the digital recorded factual material commonly accepted in the scientific community as **necessary to validate research findings** including data sets used to support scholarly publications,
  - but does *not* include laboratory notebooks, preliminary analyses, drafts of scientific papers, plans for future research, peer review reports, communications with colleagues, or physical objects, such as laboratory specimens.

# What is meant by openness

Royal Society:

*“Intelligent openness”*

- ***Discoverable*** – readily found to exist by online search
- ***Accessible*** – when discovered they can be interrogated
- ***Intelligible*** – they can be understood
- ***Assessable*** – the reliability of their source can be evaluated
- ***Useable*** – they can be re-used

# Some quotes

## OECD (2004-7)

- Publicly-funded research data are a public good, produced in the public interest
- Publicly-funded research data should be openly available to the maximum extent possible

## EC (2012)

- ...research data that result from publicly funded research become publicly accessible, usable and re-usable through digital e-infrastructures. ...

## US OSTP (2013)

- digitally formatted scientific data resulting from unclassified research supported wholly or in part by Federal funding should be stored and be publicly accessible to search, retrieve, and analyze.
- Increasing access to research data prevents the duplication of effort, provides accountability and verification of research results, and increases opportunities for innovation and collaboration.

## G8 Ministerial Statement (2013)

- We are committed to openness in scientific research data to
  - speed up the progress of scientific discovery,
  - create innovation,
  - ensure that the results of scientific research are as widely available as practical,
  - enable transparency in science and engage the public in the scientific process.

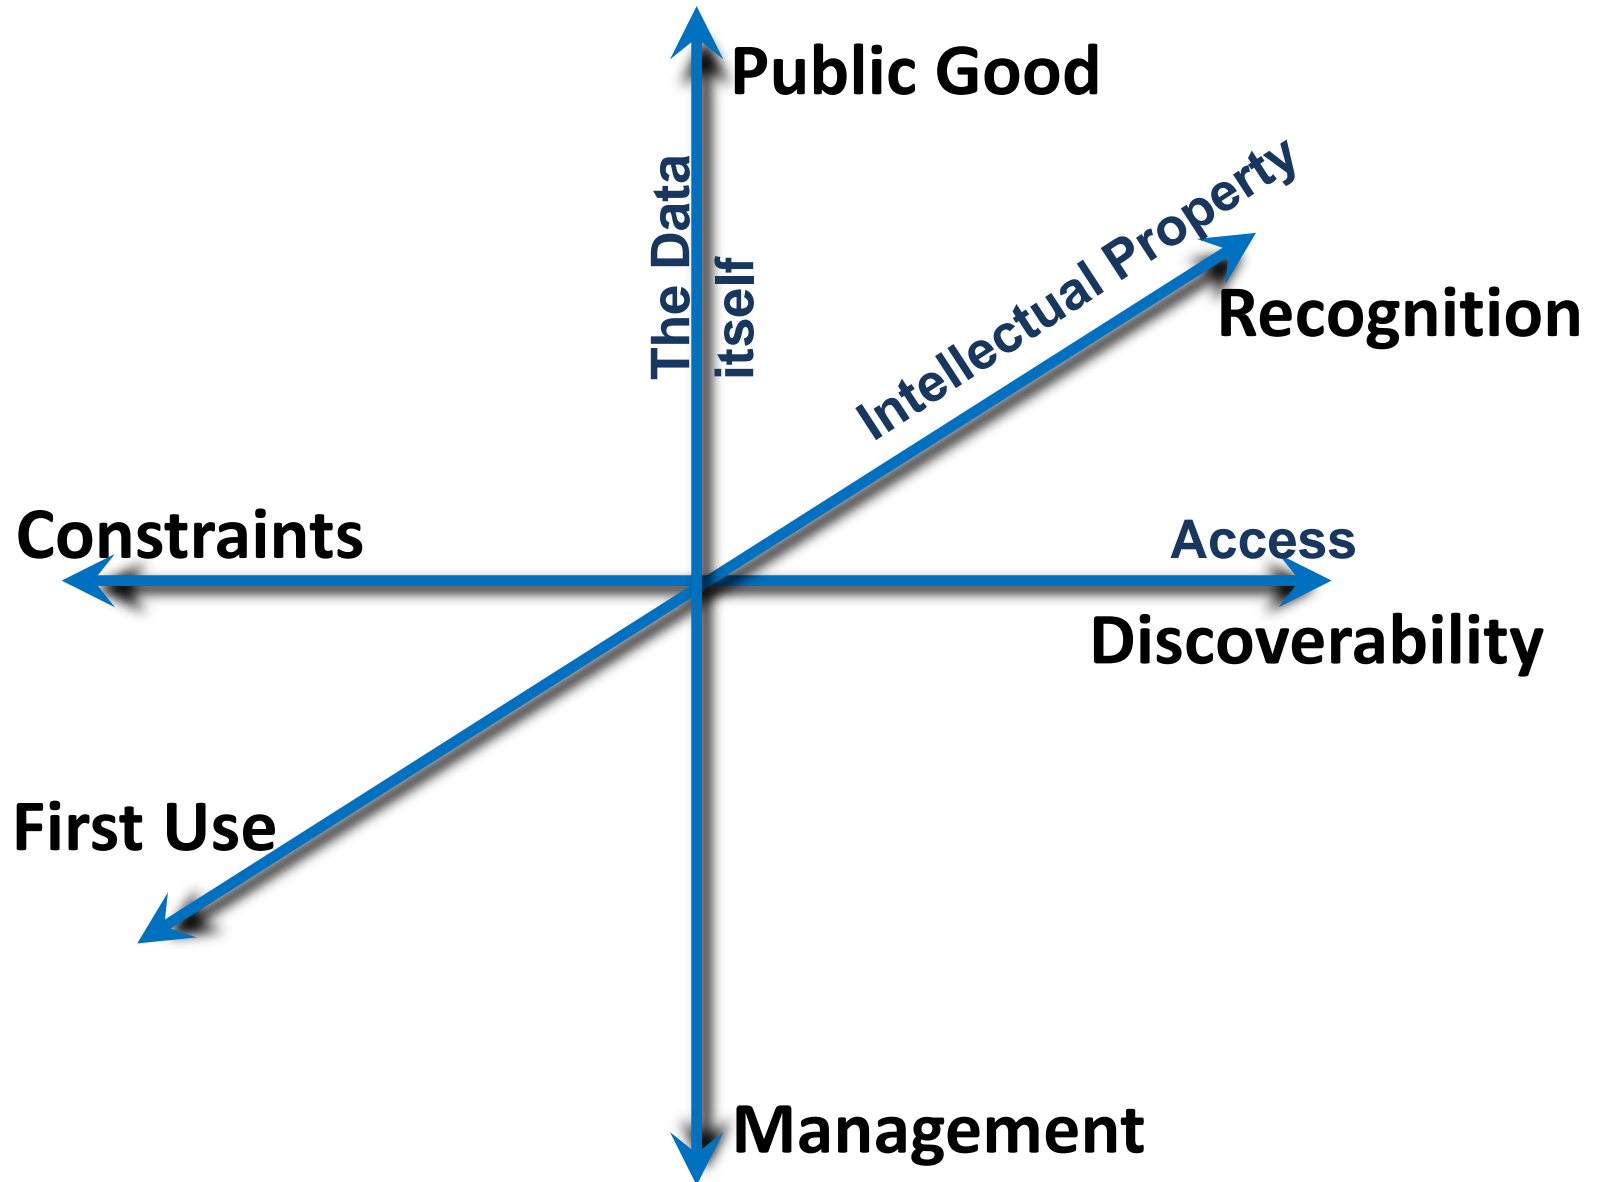

# 3 Dimensions of Policy

RCUK Principles on Data Policy (paraphrased):

1. Data are a public good....
2. Data should be managed...
3. Data should be discoverable...
4. There may be constraints...
5. Originators may have first use...
6. Reusers have responsibilities...
7. Data sharing is not free...

# 3 Dimensions of policy

# Overview

- Policy Context update
  - A quick overview of some recent policy statements
- The Research Data Alliance
  - What is the RDA?
  - Where are we now?
  - What's next?

# **The Research Data Alliance:** *Research data sharing without barriers*

## **What is it?**

**research data sharing without barriers**  
**[rd-alliance.org](http://rd-alliance.org)**

# RDA - Vision and Purpose

## Vision

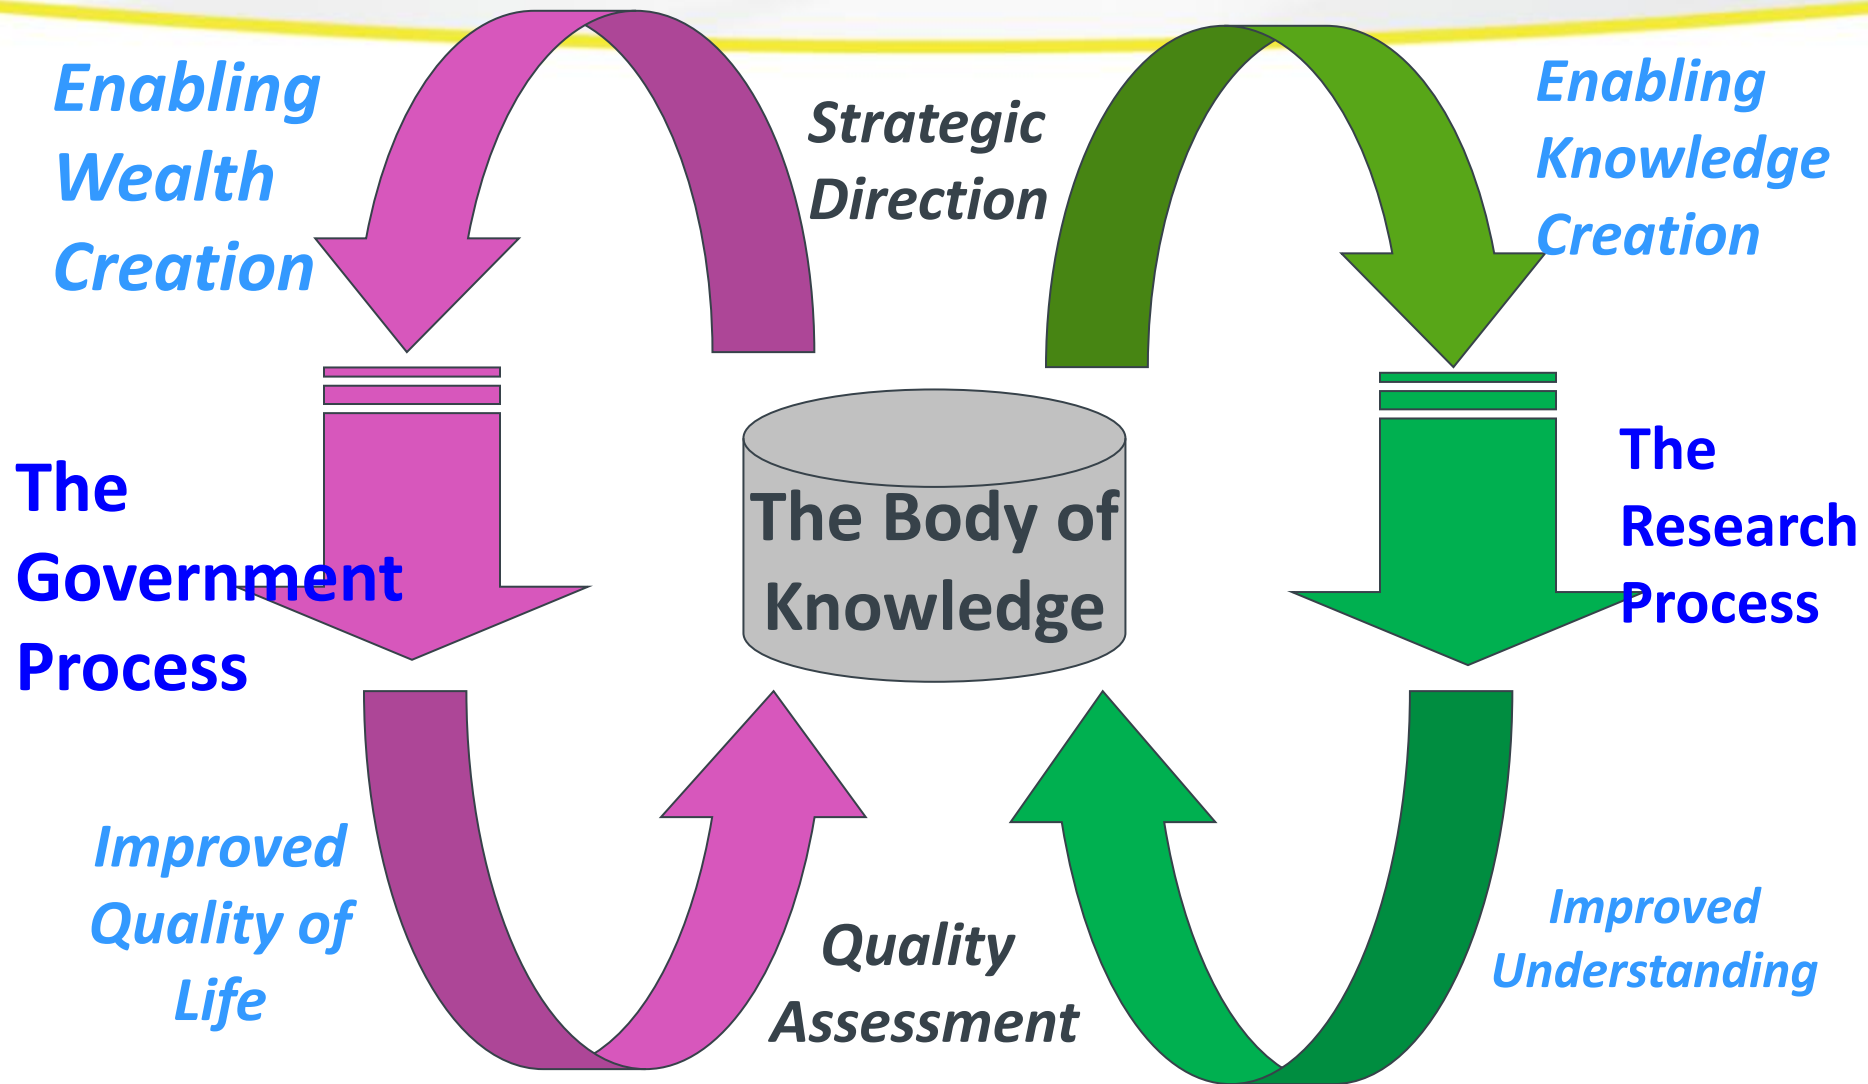

*Researchers around the world  
sharing and using research data without barriers.*

## Purpose

*... to accelerate international  
**data-driven innovation and discovery**  
by facilitating research data  
**sharing and exchange,**  
**use and re-use,**  
**standards harmonization, and discoverability.**  
...through the development and adoption of  
**infrastructure, policy, practice, standards, and other**  
**deliverables.***

# The Innovation Lifecycle

13

**Aggregation of Knowledge lies at the heart of the innovation lifecycle**

## Openness

- Membership is open to all interested organizations
- Meetings are public
- Processes are transparent
- Products are freely available to the public

## Consensus

- RDA moves forward by achieving consensus
- resolves disagreements through appropriate voting mechanisms;

## Balance

- Organized on the principle of balanced representation for individual organizations and stakeholder communities;

## Harmonization

- Works to achieve harmonization across standards, policies, technologies, tools, and other data infrastructure elements;

## Voluntary

- The RDA is not a government organization or regulatory body
- is a public body responsive to its members

## Non-profit

- Not a commercial organization and will not design, promote, endorse, or sell commercial products, technologies, or services.

# “Building Bridges”

- Bridges to the future
  - data preservation
- Bridges to research partners
- Bridges across disciplines
- Bridges across regions
- Bridges to integration

## Two types of bridges we can build:

- Connecting Data
- Connecting People

What kind of organisation do we need to do this?

# RDA Organizational Structure Provides Coordinating Framework

20

RDA Membership

## RDA Council

*Responsible for overarching mission, vision, impact of RDA*

## Technical Advisory Board

*Responsible for Technical roadmap and interactions*

## Secretary-General and Secretariat

*Responsible for administration and operations*

## Organizational Advisory Board and Organizational Assembly

*Responsible for organizational and strategic advice*

## Working Groups

*Responsible for impactful, outcome-oriented efforts*

## Interest Groups

*Responsible for defining and refining common issues*

## RDA Colloquium (Research Funders)

*Operational and community sponsorship*

# **The Research Data Alliance:** *Research data sharing without barriers*

## **Where are we now?**

**research data sharing without barriers**  
**[rd-alliance.org](http://rd-alliance.org)**

**March 2014**

*from 71 countries  
worldwide*

## RDA 1,585 MEMBERS – WHERE ARE THEY FROM?

<b>ORGANISATION TYPE</b>	<b>Total</b>	<b>%</b>
Academia/Research	1020	64%
Government/Public Services	255	16%
IT Consultancy/Development	53	3%
Large Enterprise	26	2%
Other	110	7%
Policy/Funding Agency	29	2%
Press & Media	11	1%
Small and Medium Enterprise	81	5%
<b>TOTAL</b>	<b>1585</b>	

<b>Region</b>	<b>MARCH 2014</b>	<b>%</b>
EU	774	49%
AU	51	3%
US	592	37%
Others	168	11%
<b>TOTAL</b>	<b>1585</b>	

# RDA 1,585 MEMBERS – HOW ARE THEY GROWING?

**March 2014**

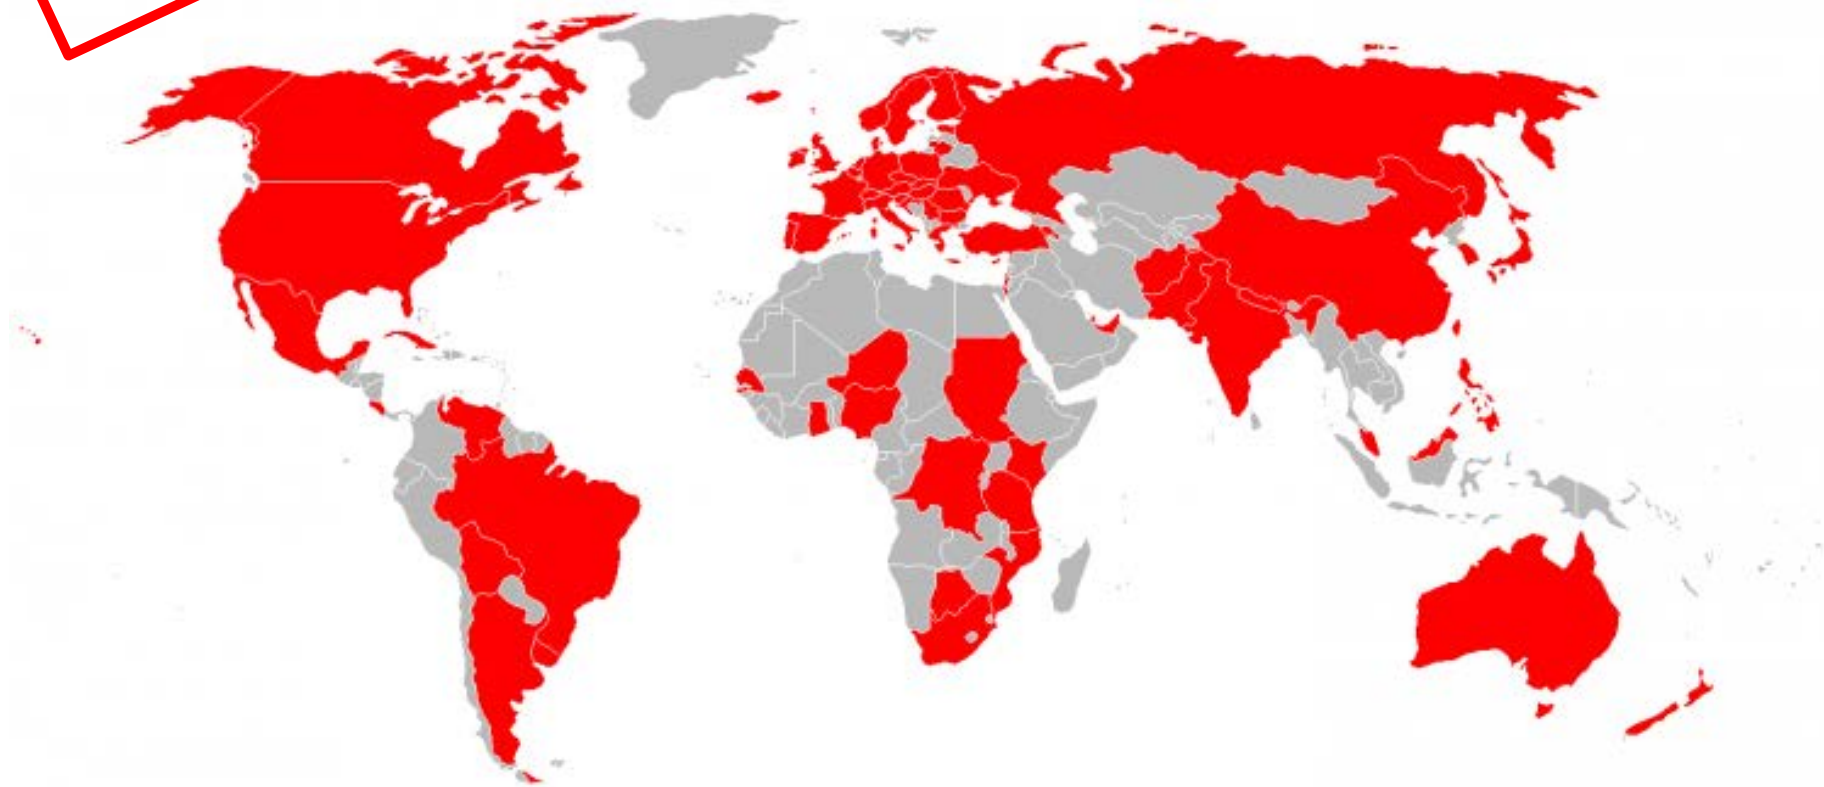

**x4 in 9 months!!**

Country/ Total	JULY 2013	SEPT 2013	NOV 2013	MARCH 2014
EU	178	271	416	774
AU	11	17	32	51
US	165	370	473	592
Others	33	56	98	168

# RDA 1,585 MEMBERS – WHERE ARE THEY ON THE MAP?

March 2014

March 2014

# RDA 3rd Plenary - 477 Participants

## What do they do?

25

# RDA 3rd Plenary - 477 Participants

## Where are they from?

26

**March 2014**

Australia	16
Europe	352
United States	74
Other	35

**477 participants from  
36 countries**

# RDA Plenary 3 – 477 Participants

## Registrants by Country

27

March 2014

# What are they doing now?

June 2014

- 10 Working Groups
  - Mostly tech focused, some domain focused
- 28 Interest Groups
  - 50/50 Tech and Domain focused
- 3 BoFs
  - “cultural”
- ~30 Organisational Members
  - poised to join

# **The Research Data Alliance:** ***Research data sharing without barriers***

## **What's next?**

**research data sharing without barriers**  
**[rd-alliance.org](http://rd-alliance.org)**

**Presented  
at Plenary 1  
March 2013**

# **Research Data Alliance @ T=0: Goals, Principles, Component Groups**

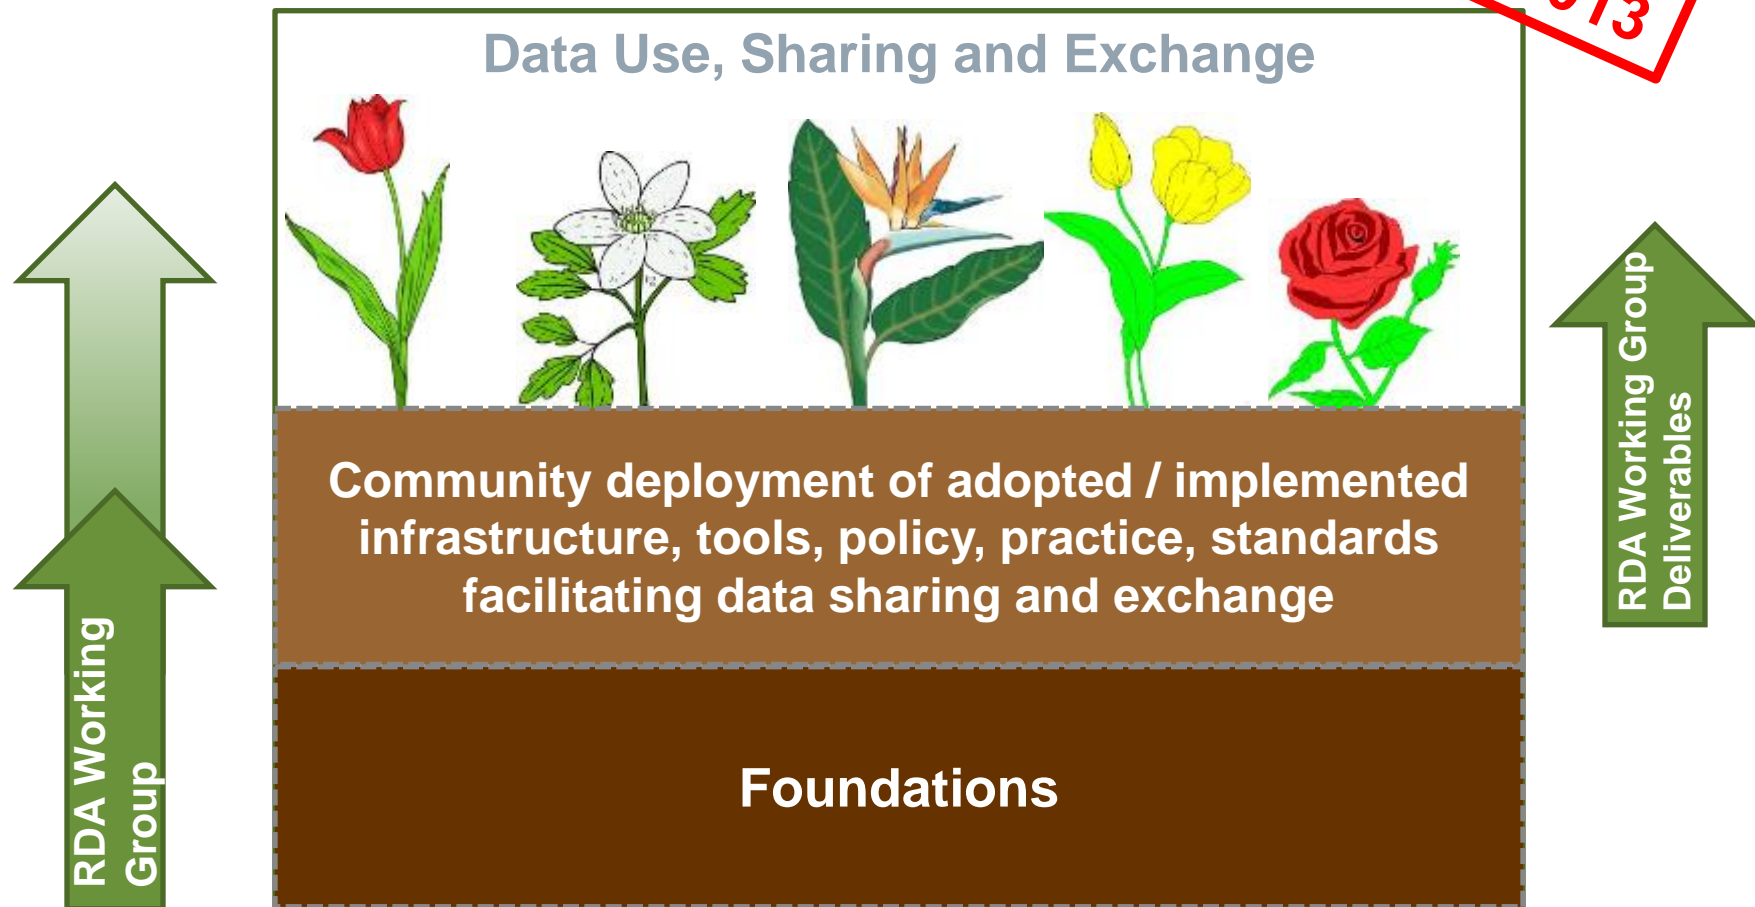

**Francine Berman, Ross Wilkinson, Juan Bicarregui**

**research data sharing without barriers**  
**[rd-alliance.org](http://rd-alliance.org)**

# RDA Working Groups Create Enabling Infrastructure

31

**Presented  
at Plenary 1  
March 2013**

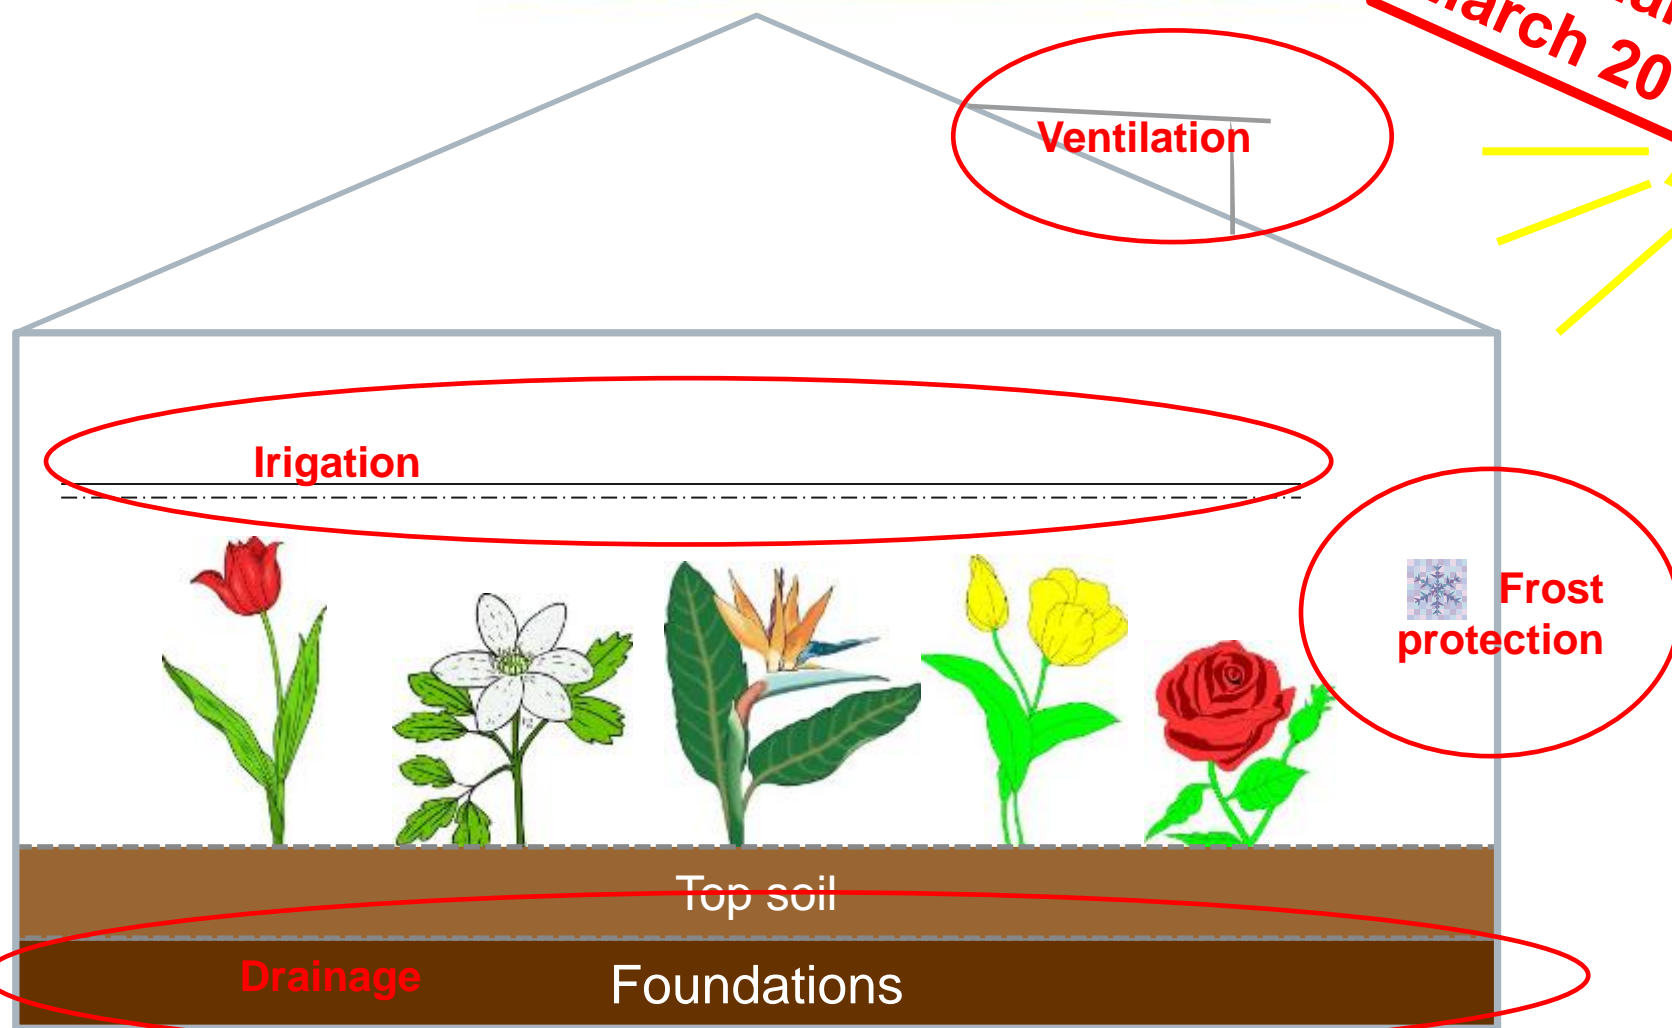

# Let the flowers grow....

32

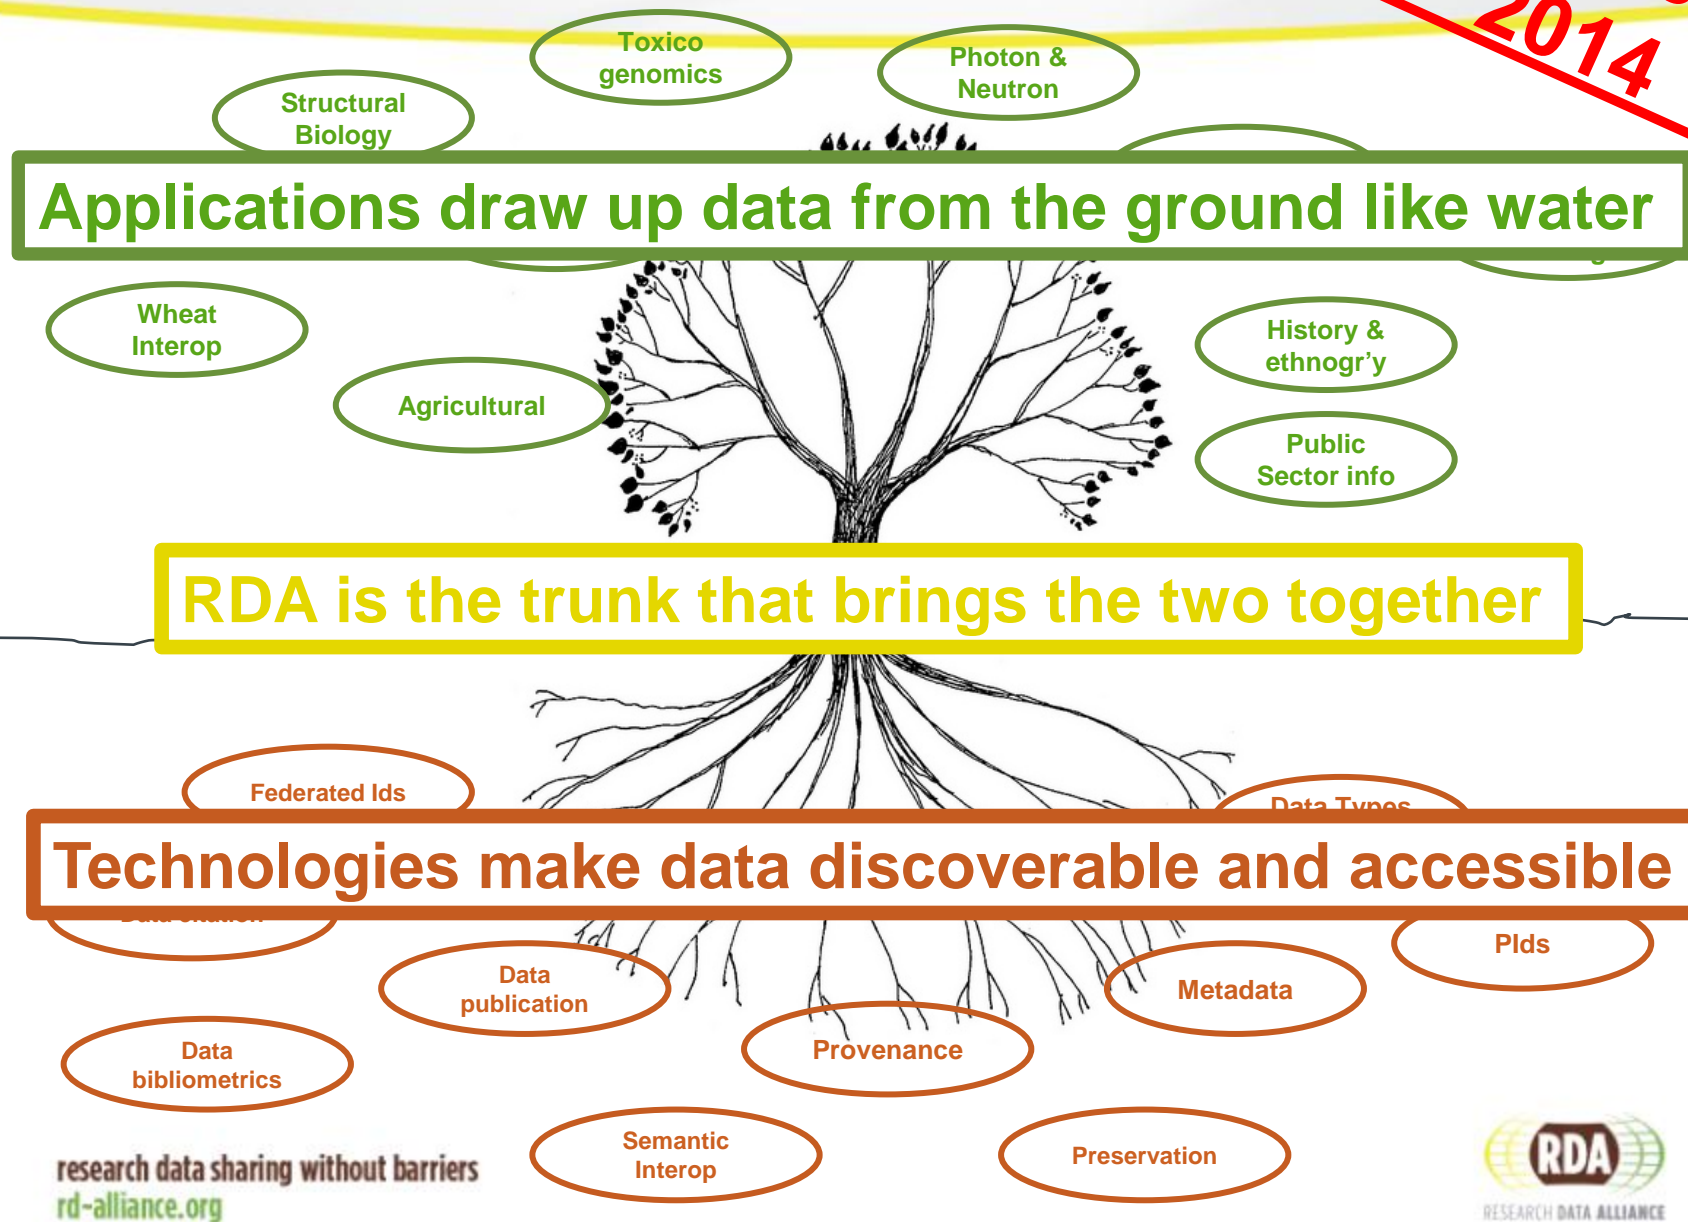

**Presented  
at Plenary 1  
March 2013**

June 2014

# The orchard needs to be managed

# Future Priorities

(a personal view)

34

- Expand Regional Representation
- Build a vibrant RDA regionally
  - Including National RDAs?
- Strengthen liaisons and affiliations
  - with related organisations
  - with disciplinary initiatives
  - With industrial members
- Oil the machine: BoF → IG → WG → Outputs
- Build the Bridge
