Action 8
Research
infrastructures

Action ...

Action 1

Enable the open sharing of knowledge and the re-use of research outputs, including through the development of the European Open Science Cloud (EOSC)

- Deploy Open Science principles, identify best practices. Make Open Science ‘the new normal’
- Deploy EOSC core components and services, federate data infrastructures, develop frameworks for interoperability and quality control
- Establish EOSC Observatory for tracking investments, policies, digital research outputs, open science skills and infrastructure capacities

Action 8

Strengthen sustainability, accessibility and resilience of research infrastructures in the ERA

- Strategic analysis of the European Research Infrastructure landscape
- Broader and more sustainable access for all countries to European research infrastructures
- Revision of the European Charter of Access to Research Infrastructures
- Update of the ESFRI Roadmap and implementation of the research infrastructures performance monitoring framework
- Report on the ERIC Framework
- Increased cooperation between research infrastructures, e-infrastructures and stakeholders, including through EOSC

Cross-e-Infrastructures governance

"collaboration and coordination of e-Infrastructure components"

"provide integrated user-friendly services towards researchers"

Requires

- policy making: identification of gaps and needs of users
- coordination of all actors in filling these gaps
- mutual learning and exchange of best practices
