## The role of IT service management in e-Infrastructures careers

Gergely Sipos  
Head of Services, Solutions, Support  
EGI Foundation

**The work of the EGI Foundation**  
*is partly funded by the European Commission  
under H2020 Framework Programme*

- Intro to EGI
- Sustainability and growth
- IT Service Management (ITSM)
- Implementation in EGI
- ITSM and career paths

## **Vision**

**All researchers have seamless access to services, resources and expertise to collaborate and conduct world-class research and innovation**

## **Mission of the EGI Federation**

**Deliver open solutions for advanced computing and data analytics in research and innovation**

## **Mission of the EGI Foundation**

**Enable the EGI Federation to serve international research and innovation together**

# EGI Participants

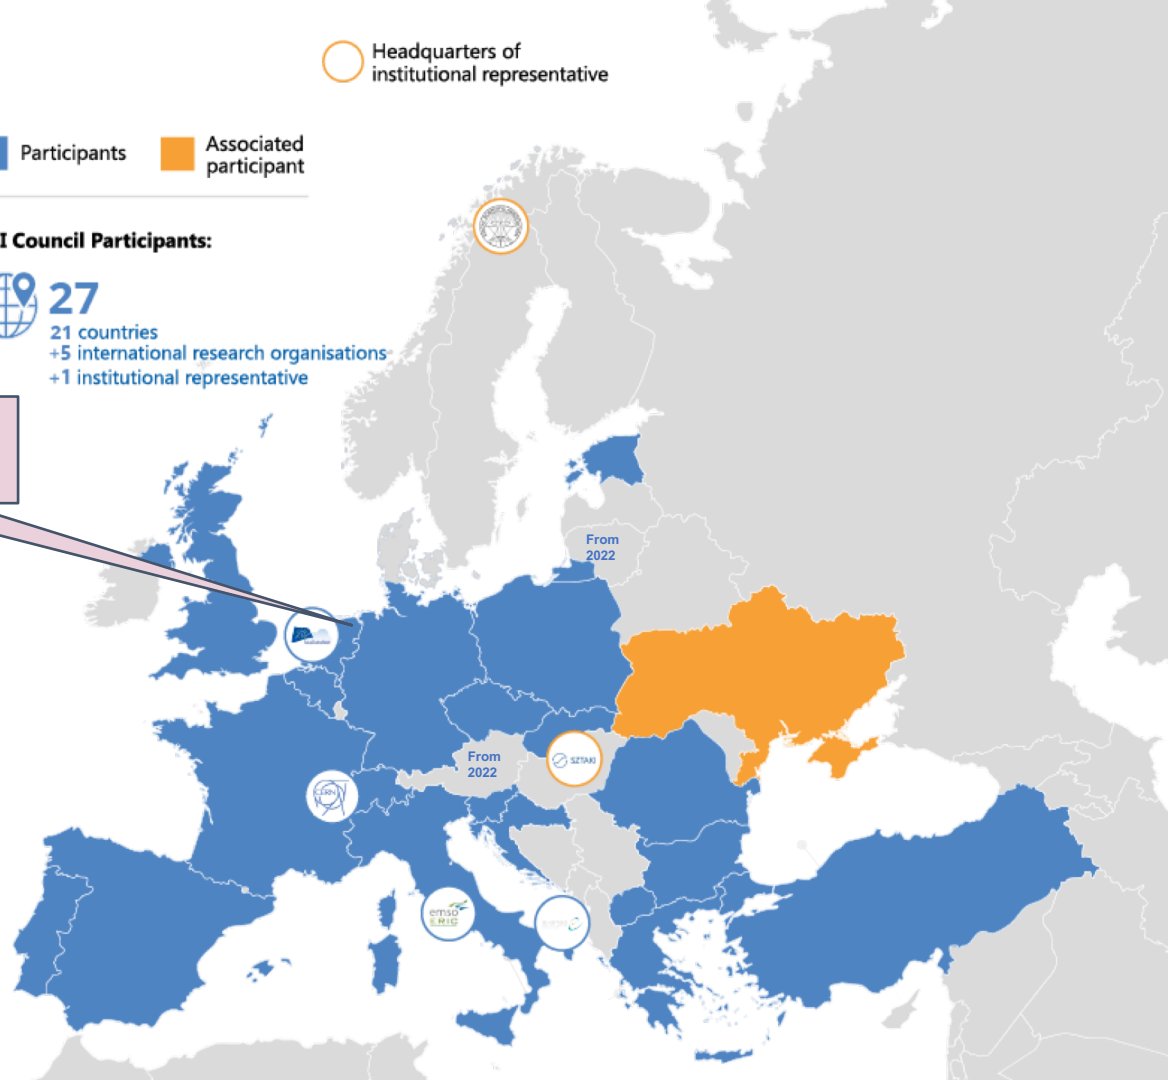

○ Headquarters of institutional representative

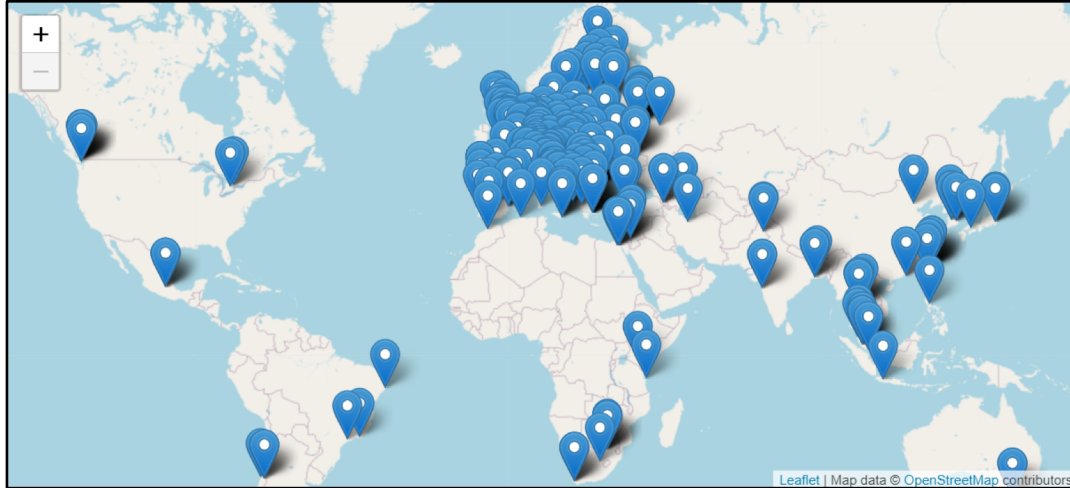

■ Participants   ■ Associated participant

## EGI Council Participants:

 **27**  
21 countries  
+5 international research organisations  
+1 institutional representative

EGI Foundation (EGI.eu)  
Est. 2010 in Amsterdam

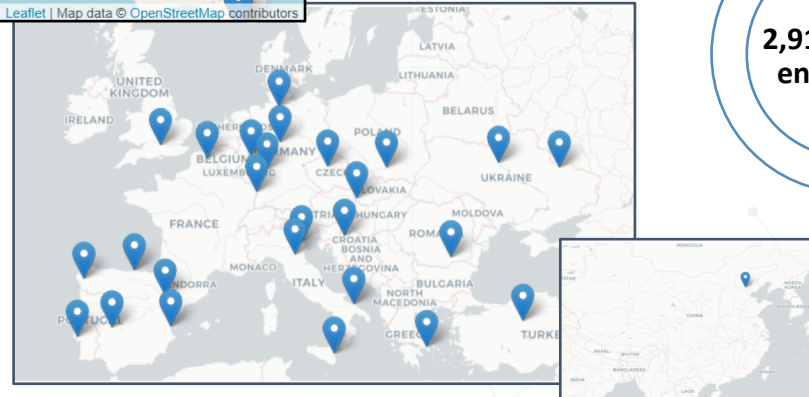

**High Throughput Compute providers**

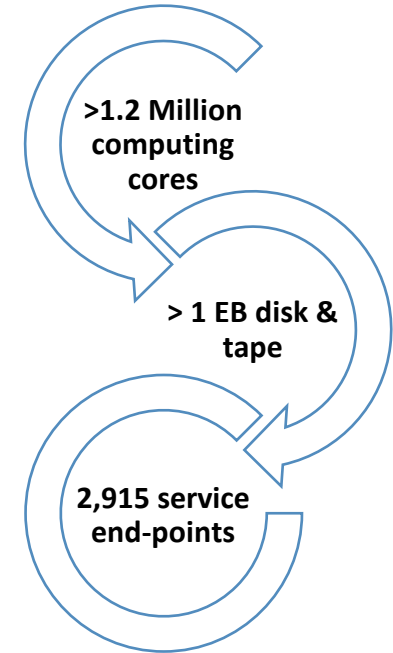

HTC: 5.2  
Billion CPU  
h/year

Cloud: 43  
Million  
CPU h/year

Over  
75,000  
users

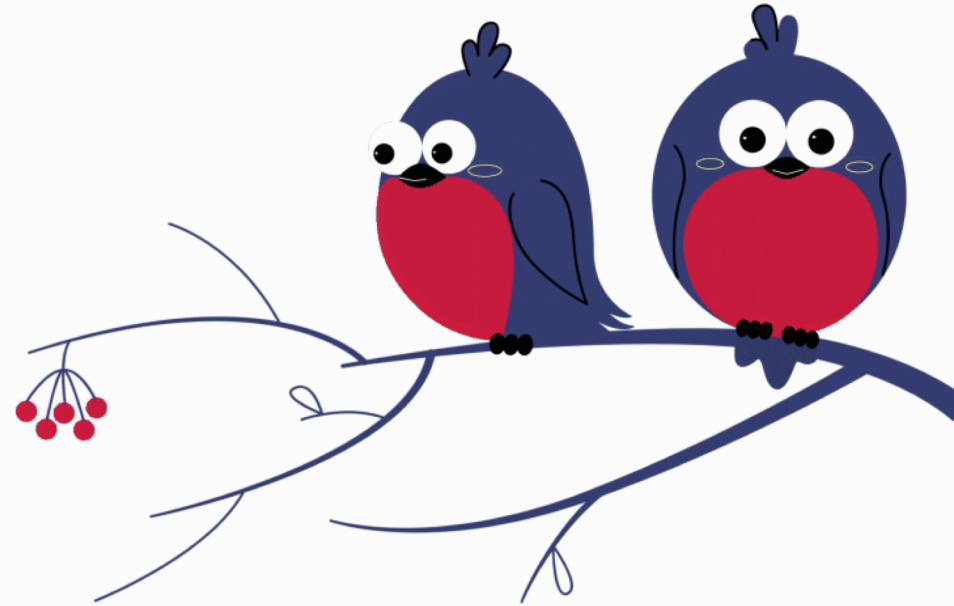

**Cloud providers**

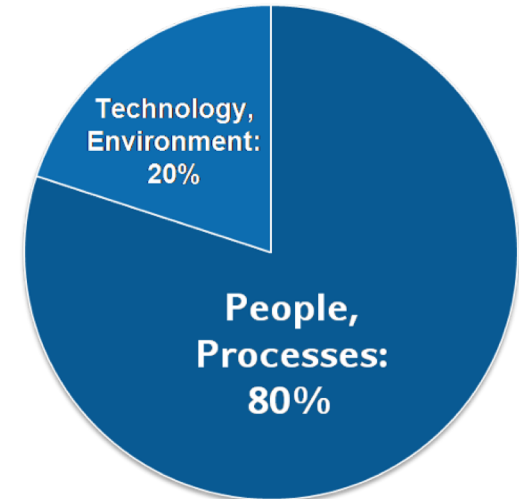

# What does it take to run an infrastructure at such a scale and quality?

- Keep the community together
- Enable growth

- **Why IT service management (ITSM)?**
  - About 80% of all IT service outages originate from "people and process issues"
  - Duration of outages and degradations significantly dependent on non-technical factors
- **IT service management**
  - ... aims at providing high quality IT services meeting customers' and users' expectations
  - ... by defining, establishing and maintaining service management processes

Reasons for service outages  
[Gartner]

- **Shift in expected results**
  - FP7 -> H2020 = Publications -> Services
  - Focus on Sustainability!
  - Major cultural shift
- **Increased customer/user expectations**
  - Commoditization of digital services
  - XaaS (Anything as a Service) now commonplace
  - Researchers don't have to just accept whatever services are offered just because they are free at point of use
- **Skills, experience and knowledge gap**
  - Diverse experience and frameworks (e.g. agile, devops, ITIL)
  - Need for a common/shared approach to professionally plan, deliver, operate and control IT services
  - Limited to no formal training

***We are now  
service providers?***

# Challenges in federated IT service provisioning

- **Traditional IT service management (ITSM) practices ...**
  - Assume single central control over all service management processes by one organisation acting as the service provider
  - Hardly address collaborative approaches to service delivery
- **As a result**
  - Applying ITSM in federated environments may be more difficult, and not all concepts / ideas will work
- **Even more important in a federated environment**
  - Understanding the roles of the federation members (including the roles or “business models” of all parties involved)
  - Not all federations are the same! This affects which part of the federation is responsible for which aspects of the service delivery

# What is FitSM

- Standards family for lightweight IT service management
- Suitable for IT service providers of any type and scale
- Main design principle: Keep it simple!
- All FitSM parts are freely released under Creative Commons licenses
- FitSM is operated and managed by ITEMO (non-profit)
- Certification provided by ICO-Cert and APMG International

[www.fitsm.eu](http://www.fitsm.eu)

 [FitSM\\_Standard](https://twitter.com/FitSM_Standard)

*The development of FitSM was originally funded by the European Commission through an EC-FP7 project "FedSM" (2012-2015)*

- IT service management

- 14 processes

## PR5 Capacity Management (CAPM) → Checklists

### REQUIREMENTS

- PR5.1 Service capacity and performance requirements shall be identified taking into consideration SLAs.
- PR5.2 Capacity plans shall be created and maintained.
- PR5.3 Capacity planning shall consider human, technical and financial resources.
- PR5.4 Performance of services and service components shall be monitored based on monitoring the degree of capacity utilisation and identifying operational warnings and exceptions.

## PR6 Information Security Management (ISM) → Checklists

### REQUIREMENTS

- PR6.1 Information security policies shall be defined.
- PR6.2 Physical, technical and organizational information security controls shall be implemented to reduce the probability and impact of identified information security risks.
- PR6.3 Information security policies and controls shall be reviewed at planned intervals.
- PR6.4 Information security events and incidents shall be given an appropriate priority and managed accordingly.
- PR6.5 Access control, including provisioning of access rights, for information-processing systems and services shall be carried out in a consistent manner.

## Process documentation

e.g. Confluence, GitLab

## Ticketing tool

e.g. JIRA, RT

## Templates

FitSM Training trends

*Remote courses 1st held in  
July 2020 (Zoom)*

## Intro

- Until now, FitSM has been delivering “personal” certifications as a formal recognition of the knowledge acquired during training.
- The FitSM Working Group, as part of ITEMO, has developed a scheme in partnership with certification authority APMG International, for an “organisation level” certification as a formal demonstration of FitSM implementation.

## Value Proposition

- Get recognition for having implemented your service management system.
- Market your professional service management to potential new customers and funding agencies.
- Receive a structured external review for both positive aspects and areas of improvement.

## How it works

- A certified auditor, with vetted credentials, spends 2-3 days formally reviewing your service management implementation with the key personnel from your organisation. Following a standard evaluation against FitSM-1 requirements with 2 potential levels:
  - FitSM Essentials: entry level certification verifying the initial key processes have reached full maturity with varying capability levels for others.
  - FitSM Plus: highest level certification demonstrating that all FitSM-1 requirements have reached full maturity with only minor exceptions.

## Associated Costs

- Auditor Fee: Subject to individual auditor service offers and days required, which is typically based on organisational size
- APMG Fee: Organisational approval, certificate and digital badge = €500.00

## Interested?

- APMG and ITEMO are currently gathering expressions of interest.
- Please visit <https://www.fitsm.eu/organisational-certification/> to learn more

# NEW! FitSM V3.0

FitSM-1 V3.0 Edition 2021 – Now in Pre-Release!

An updated version of the FitSM-1 requirements is now available in pre-release.

- No structural changes, many requirements cleaned and improved language across all processes.
- Alignment with ISO/IEC 20000 updated version, v2018.
- Many of the changes resulted from direct feedback during training courses.
- Work will continue into 2022 to update the training material and exam questions to start to certify individuals with V3.0.

## Current Demand and Scale

- EGI is establishing a trainer network programme with certification authority APMG International

## Models

- Associated Trainer
  - Full accreditation by APMG with your own audited Quality Management System
- Affiliate
  - An organisation is not interested in a full accredited training organisation (ATO) and operating/having audited its own Quality Management System.
  - Ability to reuse EGI's established QMS framework. All courses delivered must follow the defined EGI practices, including all EGI branded material.
  - Individual trainers must be certified by APMG with the relevant credentials and pay a fee (less than being a full ATO). EGI can support in the process.
  - This model is foreseen to be more attractive for EGI federation members and the wider community who are interested in providing local training.

**WE WANT YOU!**

**If you are interested in becoming a certified FitSM trainer, contact [training@egi.eu](mailto:training@egi.eu)  
A dedicated webinar is planned in the first half of 2022.**

- EC Projects with FitSM Training Planned

- EOSC Future
- EGI-ACE
- PITHIA-NRF

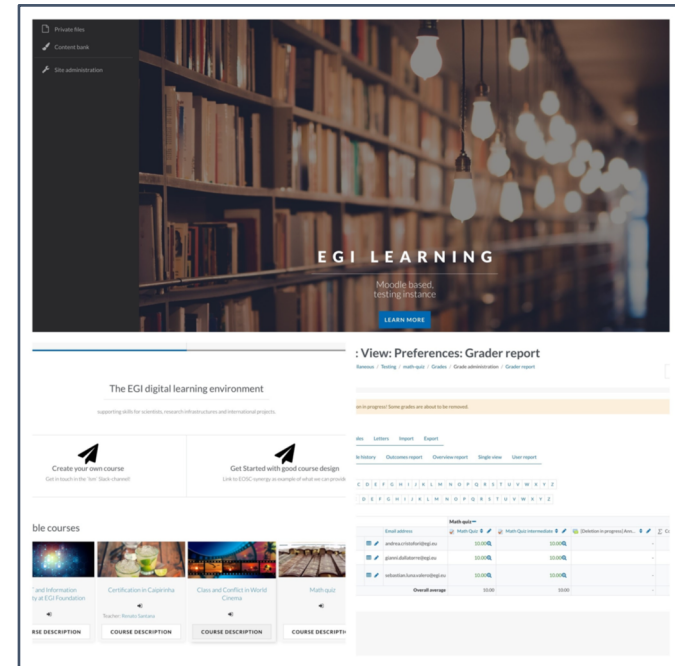

- Paid training courses available upon request:

<https://www.egi.eu/services/fitsm-training>

- In 2022:

- Moodle based EGI Training environment
- Contribute to the broader training landscape
  - EOSC Compute Platform training for operators and users (EGI Moodle)
  - Reproducible data analytics (EOSC Future Knowledge base)
